### CHICAGO POWER USED TO LIGHT BOSTON LAMPS

Superpower Test Links New England With Midwest's Giant System

EVERYDAY OPERATION

lighted yesterday with current provided by Chicago, and a Florida cow may yet be milked by current relayed from the tumbling waterfalls of Min-

A dozen companies participated in a 1000-mile test hookup, but in the opinion of Robert E. Dillon, head of the regenerating department of one of them, the Boston Edison Company, 500,000 volts would be required for conomical operation of a line this ng, which is too much to be practical at present.

Vancouver-to-Yuma Link

On the Pacific coast there is an 1800-mile hookup, with 300 miles for its longest transmission, for which 220,000 volts are required, the highest powered line now in operation, Mr. Dilion says. This system connects Vancouver, Wash., with San Dlego, Calif., and Yuma, Ariz., 1000 miles away, and at Seattle is tied into a line to Billings, Mont.

The dream of the engineer is to span the Rocky Mountains and bridge the gap between the mid-west and Pacific groups of power plants. This would form a coast to coast superpower link. Yesterday's test was described by Mr. Dillon as a step toward development of the "buss," as it is known in power circles, for relaying current across the

with portions of Minnesota, Iowa Missouri and Ohio. A majority of the 1726 central stations in this group are connected by 47,000 miles of wire, some 35,000,000 persons live in the region served, and 17,000,000,000 kilowatt-hours of electricity are furnished to 5,000,000 homes, facto-

ries and farms.

Power men gasp when asked to compute the miles of distribution wire in this territory. They estimate that in 1950, generation for the region will reach 63,500,000,000 kilowatt-hours, almost as much as for the entire United States at present.

Superpower—which power men perial Conference report on inter-claim is a misnomer—was illustrated imperial relations now issued. The in its first test on a big scale more task of the committee which prethan a year ago in the South when

### BETTER HOMES WOMEN'S LEAGUE

Mrs. White of Peabody House Appointed Chairman of Campaign in Boston

Mrs. Eva Whiting White, head of CALLED IMPRACTICAL the Hotel Copley-Plaza this noon, held by the Boston branch of the Foreign Policy Association, which has as its object "a liberal and constructive American foreign policy."

The speakers were Maj. Charles Edward Russell, commissioner to Great Britain for the United States to withdraw its supervision of the islands which its

Homes in America, an organization which each year sponsors a nationwide educational campaign for better homes. The campaign is sponsored chambers of commerce, parent-teach ers associations, women's clubs Boys and Girl Scouts, and others having an interest in improved housing and home life.

Committee of Volunteers

A committee of volunteer citizens is formed by the chairman appointed by national headquarters, and the program is planned with advice and assistance from that source. The program consists of education through lectures, debates, discussions, and exhibitions, and has its culmination in Better Homes Week, which in 1927 will be the last week in March.

During that week hundreds of new small homes will be shown through-out the United States which have peen planned for convenience and comfort, and built and furnished to meet the needs and the incomes of families of modest means. Old houses will be reconditioned, and inconvenient ones remodeled to show how. at slight expense, such houses can be made into attractive, comfortable

# CHAMBER WEEK

ral and Essay Prize Awards Included

Plans are being made for "Cham-ber of Commerce Week," to be celebrated in Boston beginning Dec. 5. Efforts are to be focused on drawing attention to Chamber of Commerce activities during the period. Three luncheons will be served at the chamber to center special attention on the various functions of the chamber.

The annual banquet and inaugural of Andrew J. Peters as president of the chamber will be a feature on the evening of Dec. 10. Announcement will be made then of the winners of the \$1000 prize essay contest being conducted throughout all New England on "What a Chamber of Commerce Means to a Community.' At the assembly luncheon last

Thursday, some mention was made of a small part of the program. Circulars were at each plate telling of the special breakfast to be served at a. m. in the main dining room of the chamber, Dec. 7, at which membership workers are to gather.
Brief descriptions of some of the

activites of the chamber have been radiocast from WBZ, last Thursday and Friday nights and others will be handled similarly, Monday and Wednesday nights of next week and week as a whole.

### THOMPSON BACK WITH NEW PLAN FOR PHILIPPINES

Report Expected to Have Important Influence on American Policy

KEENER INTEREST IN ISLANDS IS OBJECTIVE

Newspaper Correspondents on Trip Kept Fully Acquainted With Its Activities

The author of this article is a recognized authority on the Philippines. He accompanied Col. Carmi A. Thompson of Ohio during his survey of political and economic conditions in the islands for President Coolidge, and presents Arst-hand information con cerning the Thompson mission and the present situation in the archi-

By RALSTON HAYDEN, Ph. D. rofessor of Political Science, Univer-sity of Michigan

SEATTLE, Wash., Nov. 20-Col. Carmi A. Thompson of Ohio, President Coolidge's personal investigator dent Coolidge's personal investigator of conditions in the Philippine Islands, arrived here yesterday, returning to the United States through the same port as that which he left on June 15. He refused to make a statement of his findings, until his Andrew J. Peters' Inaugugress convenes, Dec. 6.

This document is expected to have an important influence upon the Philippine policy of the United States and the future of the Philippines. It may lead to early and definite action concerning the government and the status of the Islands. The anticipated presence in Washington this winter President Manuel L. Quezon, and Minority Leader Claro M. Recto strengthens the belief that it will

At President's Request

Colonel Thompson went to the Philippines at the request of the resident, "to make a survey and report to him what he might possibly lo to secure a better administration of affairs and further the economic levelopment of these islands." The instructions which he received from the White House could hardly have been broader and more general. In was not merely economic in scope It was political, as well, in the fullest sense. From these facts, and from much other evidence, it is patent that the purpose of the Thompson mission was to aid the President in the formulation of a more definite and kinetic Philippine policy, one which the Administration can actively present for acceptance by Congress and the American people

As one who is very close to the Civic Day is to be recognized dur- Chief Executive put it, meet the full responsibilities of a nation?" He might have added, What, also, can be done to secure for the United States, under conditions which will be acceptable to the \$1000 for an Idea Filipinos as well as ourselves, a future supply of the rubber and other duced in large quantities in the

### Independent Counsel Sought

In short, there is every reason to believe that Colonel Thompson was sent to the Philippines because the President wishes to establish a Philippine policy upon which he can agreement with the Filipino leaders ministration will have to its credit a portance. If he cannot do so, he will have prepared his party to seek from the people in 1928 a mandate to establish and carry out a genuinely national policy in regard to the Islands.

The most important findings and recommendations in the Thompson report, therefore, will be political. This is inevitable, not only because the Philippine question is a political cause a stabilization of the political status of the Philippines is an absolute prerequisite to any considerable economic development in the Arch-

President Coolidge has expressed complete confidence in Governor-General Wood. He might have rested his Philippine policy solely upon the advice of General Wood and other governmental officials. Evidently, however, he has sought, in addition, the carefully prepared and inde-pendent counsel of an influential Republican who has never been connected with the government of the Philippines, but who has had wide general experience in politics and

Stimulating Keener Interest Belief that President Coolidge desires to stimulate a keener interest of the United States is further justified by the part played in the Thompson mission by the represen-tatives of the press. Newspapers were enthusiastically encouraged to send special representatives with the expedition. To those who accom-panied him Colonel Thompson said: "You are a part of my party. I shall make that clear in the Philippines. You shall go where I go, if you wish to. Whoever treads on you treads on me. Absolutely everything in my files shall be open to

every one of you. We are on this

together. As for news, I know that you've got to have it and if necessary we'll go out azd make it." The Colonel was as good as his word. In planning every trip or ac-tivity in the Islands he consulted Estate, never lost eight of news values, and took particular pains to see that the correspondents were never out of telegraphic communication with their papers at the end of the day's work. The result was that during the summer some 500,000 words concerning the Philippines were sent to American newspapers by cable and wireless. Almost every viewpoint was represented among the correents, and no attempt was ever made by Colonel Thompson to restrict, or even to influence them, in what they wrote. From this angle, the mission constitutes an excellent example of the part played by the press today in government and poli-

Usefulness of Survey

When Colonel Thompson left the Philippines, opinion in the islands was very uncertain as to the probable usefulness of his survey. During the past quarter century the methods and results of American rule there have been investigated many times. General Miles, Mr. Taft, when Secretary of War; J. M. Dickinson Princeton University as the secret agent of President Wilson; Brig.-Frank McIntyre, chief of the Forbes Mission, the Monroe educational survey, the congressional party of 1921—these and many lesser political diagnosticians visited the islands "and heard great arguments. But evermore," the cynical residents wherein they went

that Colonel Thompson had sincerely sought to obtain the views of all elements of the population, although and 2400 a few Americans criticised him for mostly the secure at first hand the opinions of are known to be out of sympathy with the nationalistic aspirations of the Filipino people and antagonistic to the Filipiniation of the govern-ment of the islands. The writer knows, however, that the President's envoy received much more of this sort of opinion than was generally realized, especially toward the end of his visit

"An Honest Report"

During the summer there were many intimations in the Philippines that Colonel Thompson had been sent to the islands to make a certain definite kind of report, practically de-termined upon before he left Ohio. In connction with a strong statement in the memorandum which he is pre-paring, the colonel said to the "That is what I believe and that is what I shall say. I hope that you will believe,-I hope that everyone will believe,—that this is an honest report. I don't expect to get any office out of this job. I know that I shall be harshly criticized no matter what I write, and I intend at least to have the satisfaction of tell-ing the truth, as I see it." Those who the islands to the latter incident was were best situated to observe the one of indignation that the Pres-

Time Spent in Islands

The party was in the Philippines declaim, "came out by the same door 88 days. Of this time 34 days were spent in Manila and nine more It was almost universally agreed days occupied with inspection trips in Manila, however, that no one could through the near-by provinces. have worked harder at his difficult Thirty-three days were required for task than the latest investigator. His the two cruises, much of the steamworking day regularly began before ing being done at night, while the 8 o'clock, often much earlier, and days were used for inspection trips was rarely ended until after mid- ashore. Twelve days were spent in night, and every day was a working Baguio or in travel from the mounday. It was also generally granted tain capital as a base. More than 5500 miles were traveled in the islands, approximately 3100 by boat mostly the former. Forty-one of the ot making a more positive effort to 48 provinces were visited and conferences were held with officials and certain Filipinos and Americans who other citizens of the remaining

the itineraries of all trips were planned with the co-operation of the Governor-General's staff and of the Filipino legislative leaders, and the was almost always accompanied by representatives of both of these elements in the Government. The shore programs were made by the officials of the various provinces visited, in most instances with the co-operation of local Americans.

Although it was inevitable that many delicate situations should arise during such a survey, it is a commentary upon the general state of feeling in the Philippines, and also upon the tact of Colonel Thompson. that during the entire three months which he spent in the Islands only two unpleasant incidents occurred One of these was the threatened con flict between Moros and Christian Filipinos at Zamboanga; the other a bitter denunciation of Governor General Wood by a Filipino speaker at a public meeting in Legaspi.

Attack on General Wood

fell into the hands of the guests.

The telegram was followed by detailed instructions dispatched by mail. On the other hand, it was perof the Filipinos, although suggested Address, "Russia in 1926," by Prof.

Filipino gerius for political organization and the almost universal sentiment among the Christian Filipinos for independence. Furthermore, in any country in the world some central organiation would have assumed responsibility for directing the entertainment of such a mission. Question of Expenses

While not unappreciative of the hospitality of the Filipinos, many Americans in the Philippines deemed it extremely unfortunate that the official representative of the President of the United States should have been sent to investigate the islands partially at his own expense and partially at that of the Filipino taxpayers. It seemed to them to be carrying national economy a little too far, and to place the investigator in a somewhat delicate position with reference to his hosts. Because the obligations of the mischief executive. Colonel Thompson sion of the Filipinos have been frequently misunderstood, it is important that the facts be clearly stated.

It was the original belief of President Coolidge that he could defray the expenses of Colonel Thomps and his official party from public funds (American) at his disposal. it would be better not to dignify that Later this was discovered to be imfellow by replying to him or noticing what he said. That was precisely expedient to go to Congress for an what he wanted me to do."

Filipino members of the commitappropriation. Colonel Thompson nevertheless offered to proceed with tee in charge of the meeting afterthe project paying his own expenses and those of Mrs. Thompson and his ward stated in some embarrassment that they were as much surprised as was Colonel Thompson; that the two secretaries. This he did.
While in the Islands the party was

speaker had asked to be allowed to furnished with special trains upon three occasions and with small govhis opportunity by trying to pay off ernment vessels for use in the inter island trips. These vessels were regu commission, however. The traditional hospitality of the Philippines was in evidence through-out the survey. Indeed, there were the additional expense of employing them on these cruises was pro-rated among the members of the party and repaid to the Government, gation had been smothered with that no repayment was made for the additional coal used during the voy-

ervers who many times watched the ages. Paid From Local Funds

This expense was met from the fund. Some of the provincial entermotor trips, were inclined to believe that the Colonel's methods of getting tainment was paid for from provincial funds, but most of it was private hospitality of the sort which would have been extended even though the main expenses of the sur vey were being met by the United States Government.

After the Wood-Forbes mission had it was widely advertised that the completed its work it was discovered. greatly to the chagrin of the commissioners, that a part of its expenses had been paid from the famous independence fund, and when Vood-Forbes report did not meet the wishes of the Filipinos very disagreeable references were made to this circumstance. All things considered, it would seem highly desirable that the expense of public service of the sort performed by the Wood-Forbes mission and by Colonel Thompson should be defrayed from the public

funds of the United States.

The correspondent of The Christian Science Monitor accompanied the Thompson party on most of its trips through the northern and central islands. He traveled alone, however, ing by small inter-island steamers. automobiles, horseback, afoot, in Moro vintas, and, through the courtesy of the United States Navy, in the air. He has subsequently been able to check and supplement his own survey of this most interesting part of the Archipelago with data gathered by Colonel Thompson.

### Nation's Libraries Benefit Through the Carnegie Fund

Corporation Reports That Largest Single Item tice sheet" shows that in addition Was Used to Increase Their Usefulness

Special from Monitor Bureau NEW YORK-Library service, instruction in the fine arts, educational grants from the \$6,000,000 appropriation made by the Carnegie Corporation of New York for educational purposes during the fiscal year ending Sept. 30, 1926, according to its annual report just made public.

The largest single appropriation was made to "increase the usefulness of the American library," the report said. During the next 10 years the sum of \$4,500,000 will be spent by the corporation for this purpose. Most of this will be used to improve existing library schools, in founding graduate library school of a new type at the University of Chicago. and on the work of the American Library Association.

The usefulness of the library depends largely upon the professional raining of the librarian, Frederick Keppel, president of the corporaimportance of a higher type of ibrary training.

"Contrary to public opinion," he continued, "the record of library service is not really as impressive as it seems. In the United States and Canada alone there are 50,000,000 people without access to local pub lic libraries. Thirty-seven million dollars has been spent on libraries in the United States and Canada, but this amounts actually to only 32

"The corporation aims to help Governor - General's discretionary state and provincial library authorities to extend more adequate library service to the people, and at the same time, through grants to educaional institutions, to encourage higher type of library training."

Colleges Get \$600,000 for Art The second largest grant was made in American colleges. An appropriation of \$600,000 was made to provide colleges with representative and adequate collections of art material comparable to equipment used in teaching other subjects of the curriculum Twenty American colleges have received these collections and the only condition imposed is that they use them for teaching and set aside a well-lighted room to house the equipment and serve as a center for col-

lege art activities, the report said. dents to prepare themselves for the career of art teacher in American colleges. These men and women, who represent 16 different colleges, were selected by a committee of experts and are preparing themselves for an art teaching career under the direction of some American institution of their own choosing; either at home or abroad.

appropriation of \$300,000 for adult education was used chiefly in making a two-year survey of this branch of educational activity in the Inited States and in establishing the American Association for Addit Eduation. The survey showed that adult education, which affects more than 3,000,000 men and women in this country and costs over \$100,000,000 annually, consisted of a series of unrelated enterprises. In an effort to correlate these activities, conferences of progress, and development while of educational leaders were held in all sections of the country, resulting Anthony Bimba of Brooklyn will in organization of the American As-

Duties of Organization Morse A. Cartwright is head of the new organization, which is directed by outstanding educators, among whom are James E. Russell, dean of Teachers' College, Columbia University; Prof. Leon J. Richardson of the University of California; J. H. Puelicher of the American Bankers' Association, Milwaukee, and Miss

## SPREAD OPPOSED

Committee of One Hundred Asks Separate Vote on Rest of McFadden Bill

Special from Monitor Bureau CHICAGO, Nov. 20 - Organized resistance to the extension of branch banking in the United States will be vigorously maintained by the Committee of One Hundred representative | European Chancelleries Are to a head by a letter from Sir Austen of the small banks and the scattering of larger ones opposed. At the committee's headquarters here it is announced that preparations are being made to contest any attempt of branch bank advocates to put their legislation through at the coming session of Congress.

Splitting up of the McFadden banking bill so as to promote a vote bn its important non-controversial featooth houses and is now in a conference committee representing the Senate and House. What is regarded in banking cir-

cles as the victory for branch banking at the convention of the American Bankers' Association at Los Angeles this fall, when the association declined to renew its former indorsement of the Hull amendments designed to limit branch banking scounted by the Committee of One Hundred," said E. N. Baty, its secretary, "because of the circumstances surrounding the vote."

Vote Held Unrepresentative "We regard the action of the American Bankers' Association," he added "as merely the loss of a skirmish. The Los Angeles convention was held in a state where branch banking has had its largest development and the managers of branch banks were allowed to vote on the question. The vote for branch banking totaled but 413. This number represents less than 2 per cent of all

the banks in the country."

The growth of branch banking in the last five years has been so rapid that there are today more than 2000 branch banks in the 22 states where branches are permitted, Mr. Baty said. However, he continued, nearly all of the branch banking, 80 per cent to be exact, is confined to six

states.
The McFadden bill without the Hull amendments would permit the exten-sion of branch banking into the 26 ized, he added. To prevent it, the Committee of One Hundred supports

the Hull amendments.
The McFadden bill, he declared, was marily designed to permit branch iking throughout the United tates, its other features of unquestioned value being included, so as to make it more certain of passage, this policy being adopted after straight branch bank bills had been defeated

Would Split Up Bill

"It is most unfortunate that a renewal of the federal reserve charter and other noncontroversial features in the McFadden bill must be held up." Mr. Baty said in a recent report to his organization. "because of the determination of the branch bankers to obtain federal legislation which accelerate the spread of branch banking.

considerable discussion regarding a splitting up of the McFadden banking bill. It has been pro-posed that the branch banking issue be eliminated from the McFadden bill, the rest of the bill enacted, and the branch bank issue discussed and BELGRADE AERO-CLUB

legislated on separately.

"That of course is both the wise and fair thing to do. However, we attempted to get this done several months ago and met with no success vocates, both in and out of Congress, that their only chance of securing permissive branch hand lated out the nation. Moreover the that their only chance of securing out the nation. Moreover, the recent permissive branch bank legislation great flights of Serbian airmen from was to include in the same bill numerous other provisions of com-mendable and noncontroversial nature. There are also parliamentary obstacles which render difficult if not impossible, a division of the bill."

### RUMANIAN ISSUE MUCH TO FORE

Busy With Conjecture-Carol's Return Mooted

> By SISLEY HUDDLESTON By Wireless

PARIS, Nov. 20-There is serious discussion on the question of the eventual succession to the throne of Rumania in diplomatic circles. While ures is favored by the National Anti-Branch Bank Organization, but it whether this can be accom- dinand should cease to exercise the the written petitions are not conplished because the bill has passed functions, there is a general desire that the dynastic problem caused by dinand is beloved by his people, par-ticularly because of his sacrifice of his personal feelings as a Hohenzolfern in making a common cause with the allies, and thus realizing a greater

> But legally his heir, as the result of regrettable incidents is his grandson Michael, who is only 5 years of age. A regency council is certainly envisaged, but since it does not sit and does not participate in the administration of affairs, it is practically non-existent, and it would be altogether inexperienced. Hence the chancelleries of Europe are extremely busy working out plans for the future of Rumania.

> Sometimes they favor the union of Hungary and Rumania, each nation keeping its essential autonomy, but accepting one sovereign. There are rumors of a possible matrimonial alliance between the pretender of the Hungarian throne with the Rumanian royal house, alternate with a proposed arrangement for the return of Carol. There is absolutely no reason why these matters should occupy diplomatic attention at this particular moment, and in so far as they have served to shorten the visi of Queen Marie to America, they are

to be greatly deprecated.
Yet it is certain that Europe is not able to look on at the dynastic muddle in central Europe without special interest, for any temporary weakness of Rumania would invite diplomatic moves. Russia notably is ready to retake Bessarabia, and Hungary, unless an accord is reached, feels it has its irredenta in Rumania. These apprehensions which have existed in certain quarters for a long time are beginning to show themselves publicly, and the delicate subject is openly treated by diplomatic writers in French newspapers.

European bridge. The association of first instance since its establishment the two countries is fortified by 30 years ago that it has been entirely proposes as a solution of the difficul-ties, a return to the state of things The head of the plant says the shutexisting before last January, namely restoration of Carol's rights to the throne. GENEVA, Nov. 20-The controversy between the mandatory powers and the mandates commission of the League of Nations has been brought Chamberlain addressed to the secre tary-general of the League, protest ing against the commission's lengthy questionnaire concerning the details of administrative and legislative ac tivities of the mandatory powers. Sir Austen is particularly concerned at the theory that a hearing should be given native petitioners, which, in the belief of the British Government, would greatly embarrass the manda tory powers by opening the door to agitators of every sort.

He points out that if the replies to sidered satisfactory, the proper course for the Mandates Commission that the dynastic problem caused by the renunciation of Carol of the crown should be settled. King Fer-dinand is beloved by his records. be willing to give. Failing that, it is for the Council of the League, he asserted, to suggest what final action that the British Government and its ross-examined in that way and that ceeding its authority under the Covenant of the League in taking the present attitude

The letter though dignified and courteous is nevertheless felt here to be rather an unmerited snub for Mandates Commission, which in all honesty has been endeavoring to find the truth regarding alleged abuses in mandatory areas. It is felt that while the Mandates Commission is still seeking to discover the truth of what is happening in Syria, with the sole aim of finding a solution for the present unhappy state of affairs there, Sir Austen Chamberlain's sharp criticism of the commission is somewhat inoppor-

The task of the Mandates Commission is difficult enough, without making it more difficult. That, atleast, is the feeling on the commis-sion, which conceived the quesonnaire solely in the intere native mandates areas. It remains to be seen what the Mandates Commis in will do, but as undoubtedly the great powers are behind Sir Austen, there is little doubt that the keener searchlight which the commissi desired to throw on the administration of mandatory authorities will have to be masked.

### New England Council Begins Year With \$100,000 Budget tive to sit in at the sessions in order that he might report news of particular interest to his community. In this way, Mr. Pape said, the en-

Conference at Hartford Closes With Dinner to will be enlisted in the movement. Editors and Publishers

cial)—With a budget of \$100,000 pledged to the work of "selling New England" the New England Council today started on another year of activity in the six-state campaign for the development of the agricultural, commercial and industrial interests of the northeastern section of the United States.

The conference closed yesterday afternoon with addresses in which the delegates were urged to go forth and "finish the job of selling New Englanders and the entire country." These addresses were made by Louis K. Liggett and Col. Frank Knox and followed by a number of 10minute talks.

In addition to Springfield, Mass., Cambridge, Mass., Manchester, N. H., and Portland, Me., have made bids for the third annual conference next

The concluding event was a dinner at the Hotel Bond last night which John S. Lawrence, president of the council, gave to 30 editors and publishers of newspapers in all six of the

Trouble With New England The trouble with New England is that it has reached industrial ma-turity, and in order to meet the onrushing competition from remote sections of the country, it must

undergo rejuvenation," said Mr. Lawrence called the newspaper leaders together to give them an opportunity to hear a summing up of the results of the two-day confence to discuss the policies being shaped up by the conference, and to organize newspaper influence for the promotion of New England's busiss future. The toastmaster was

Colonel Knox. After Mr. Lawrence had recited the history of the conference, told of its purposes and its hopes for the Barrett Andrews of Boston one of the organizers of the movement, urged the newspapermen to help the cause along by inspiring their respective communities with editorials and news stories depicting the progress being made by New England industries, commercial establishments and agricultural proj-

Dudley W. Harmon, executive-vice-president of the council, suggested that editors remove the news barriers set up by political boun-daries of states and treat the de-velopments in New England in terms

where New England business men did not even use their own products, where eggs that might have been purchased in New England if the marketing had a standardized and regulated system have been imported from other sections of the country, and then emphatically pointed to the necessity of enlisting the support of every individual, men and women, in this forward New England movement. He showed how the removal of a certain factory in one town, a matter that had at first been treated with indifference in that community, had affected the entire

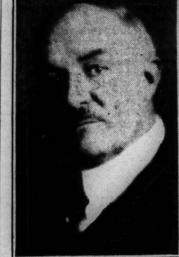

After describing the changed conditions in merchandising in the last two centuries from the time when to the present day when they must face competition in a hustling market, Mr. Lawrence emphasized the importance of organized activity on the part of every New England state, important not collected to write to all the factory executives of that city for that co-operation. Mr. Waldo further advised that it was time for New England to counteract the great mass of publicity still pouring in from Florida and California which he described as "proportion". state, important not only to New ganda to sell only their climate, England, but also to European coun-

through their newspapers of the im England products in New England. The newspapers can help, he con-tinued, by furnishing their readers with information about New England products which they have not yet had. With such a leader as Mr. Lawrence, with the enthusiasm shown by the 1200 delegates, with the women keeping the cash registers ringing, and with the newspapers spreading the gospel of a bigger, etter and more prosperous New be obtained he said.

Mr. Harmon outlined what he ex-pected from the newspapers—the treatment of trade developments as legitimate news to be "played up" as matters of vital importance

No Dissenters

Following these informal talks, the newspapermen were asked to explain their views on the conference. There was not a dissenting voice among the half dozen speakers among the newspaper men. Maurice S. Sherman, editor of the Hartford Courant, however, suggested that something be done to obtain co-operation from manufacturers who are about their business for fear of nerhaps betraying a secret to competi-tors. He said this attitude deterred trial news along the lines wanted by the conference. He suggested that the council take steps to persuade attitude.

NEW TRAFFIC RULE SUNDAY

Fixed Posts to Be Manned Every Day From Noon to Midnight

With 75 additional policemen trained for the service, the Boston police traffic divisions will, tomorrow at noon, take over the work of man-ning all fixed traffic posts in Boston up to midnight every night and on Sundays and holidays. Herbert A. Wilson, police commissioner, issued the new order last night.

The downtown traffic division under Capt. Bernard J. Hoppe will cover the fixed posts in the North End, downtown mercantile, financial and retail district and Charlestown, according to the new regulations, while the Back Bay division under Capt. James Laffey, will have charge of all the traffic posts in the West End, South End, Back Bay and Rox-

The police captains in the districts covering South Boston, East Boston, Dorchester, Jamaica Plain, Brighton, Mattapan, West Roxbury and Hyde Park, will be in charge of all the traffic posts in their respective dis-tricts from 12 noon till 12 midnight every day in the year. They will man these posts with patrolmen from their stations.

Under the new traffic plan, officers assigned to the traffic divisions will have the day and night work divided. They will have one day or relief in every seven and when they are required to work on a holiday they will receive an additional day off.

For the present, neither of the two traffic stations will be open on Sundays, holidays or nights. The men handling the traffic for the regular traffic\_divisions will report for rollcall at their respective divisions, but will report at the close of their tours of duty to the station house covering the district in which their traffic posts are located.

It shows the skilled handling of in- tional speakers, including Rober struments one might easily expect Corradini, Italian economist and from the practised hand of the com-poser, who is himself a member of tongue. the London String Quartet. The first movement progresses with a contrapuntal weaving of tonal strands B. U. ART STUDENTS which has been made very effective. The Scherzo and Presto, second and third movements, recall distinctly the composer's "Pixy Ring," in the mood of whimsical playfulness as well as in the original manner of string writing. Mr. Warner's Trio was awarded the prize of the Berkshire Chamber Music Festival of

Pizzetti's music was of a very dif-ferent style. Without employing any startling devices, without resorting to unusual tonalities, without striving for any strange media of expression, the composer, has produced a work of vital content. The impression left by this music last evening was as strong as that of the F major Sonata for cello and heard recently in Boston, although its atmosphere is quite different. The sonata is elegiac in mood, while the trio leaves an impression of force-

For opening music, the players and Allegro. In these two works, the familiar Beethoven, and the smooth Loeillet, there stood most plainly revealed to the listener, since the ear was less engaged with novel music the excellences of individual and ensemble playing for which the

Concerts to Come

On the same afternoon, in Mechanics Building, the third concert by the Boston Philharmonic Orchestra. Ethel Leginska, conductor. The program includes Brahms' Academic Overture: Mendelssohn's Capriccio Brilliante for piano and orchestra, with Justin Sanbridge as soloist; Korngold's Suite from the incidental music to "Much Ado About Nothing," and Rimsky-Korsakoff's "Shéhérazade Suite" Sunday evening, Nov. 21, in the Lecture Hall of the Boston Public Library, a concert by the Lenox String Quartet of New York. Thryugh the generosity of Mrs. Elizabeth Shurtleff Coolidge. There will be no admission charge.

On the same evening, in Symphony On the same afternoon, in MechanHall, a concert by Pompeo's "Symphony Band."

Monday evening, Nov. 22, and Tuesday afternoon and evening, Nov. 23, in Symphony Hall, entertainments by Raguel Meller.

Symphony Hall, entertainments by Raquel Meller.

Tuesday evening, Nov. 23, in Jordan Hall, the first concert of the season by the Apolio Club, Frank H. Luker, guest conductor, with Lambert Murphy, tenor, assisting.

Wednesday evening, Nov. 24, in Jordan Hall, a recital by William Gerard Collins, baritone.

Sunday afternoon, Nov. 28, in Jordan Hall, the first concert of the season by the People's Symphony Orchestra, Stuart Mason, conductor. The program includes Beethoven's Overture to "Fidelio," Tchalkovsky's Fourth Symphony, Satie's "Trois Pièces Montées." Rimsky-Korsakoff's Spanish Caprice, an aria from Donizetti's "La Favorita" and songs with plano. Dorothy George will be the singer.

On the same afternoon, in Symphony Hall, a recital by Tito Schipa.

Monday evening, Nov. 29, in Symphony Hall, the third concert in the Matter of Controlling Building Becomes Issue in Primary Campaign

QUINCY, Mass., Nov. 20—Quincy's zoning problem is one of the issues in the mayoral and council campaign for nomination at the preferential primary on Nov. 30. Residents of the large residential districts, such as President's Hill in Ward 1; Wollas-ton, Ward 5, and Norfolk Downs, Ward 6, are asking the candidates where they stand on zoning protection for the home sectors of the city.
On Monday night, in the Masonic Monday evening, Nov. 29, in Symphony Hall, the third concert in the Wetterlow - Wolfsohn series, with Maria Kurenko, soprano, as the artist. Wollaston Improvement Association, of which William K. Embleton is Maria Kurenko, soprano, as the artist. Tuesday afternoon, Nov. 30, in Symphony Hall, the first of the Tuesday series of concerts by the Boston Symphony Orchestra, Serge Koussevitzky, conductor, with an all-German program made up of Beethoven's Overture "Leonora" No. 3, the Prelude and Love-Death from "Tristan," Strauss' "Till Eulenspiegel" and Brahms Fourth Symphony.

Tuesday evening, Nov. 30, in Jordan Hall, a piano recital by Helene Diedrichs.

Wednesday afternoon, Dec. 1, in Jordan Hall, a piano recital by Clara Rabinovitch. president, will hold a Candidates' Night, with novel features to add to the interest in the contest. In view of Mr. Embleton's efforts of years for the adoption of zoning regulations in this city, it is expected the candidates for Mayor and the City Council will be quizzed on this question Monday

Small Stores in Residential Sections Since zoning regulations were first seriously advocated for Quincy, and the ordinance adopted by the council was sent to the people as a referen-dum, certain residential sections of the city have been honeycombed by small store buildings, many of which are still idle.

Rabinovitch.
Friday afternoon, Dec. 3, and Saturday evening. Dec. 4, in Symphony Hall, the seventh pair of concerts by the Boston Symphony Orchestra, Serge Koussevitzky, conductor, with Alfréd Cortot, pianist, as soloist in a Mozart Concerto and in Franck's "Symphonic Variations." The other numbers will be Bach's Brandenburg Concerto in G major and Debussy's "Iberia." In one of Wollaston's finer residential streets, for instance, stand Saturday afternoon, Dec. 4, in Jordan Hall, a recital by George Ray. tecturally and built about the same time several years ago. Recently, mond, tenor.

Saturday evening, Dec. 4, at Dana
Hall School, Wellesley, a concert by
the English Singers of Elizabethan
madrigals and other part-songs.

Sunday afternoon, Dec. 5, in Symphony Hall, a recital by Josef Hofin abeyance, one of these residences three-family apartment house, curtailing light and ventilation of the

tailing light and ventilation of the adjoining building.

The owner of the latter house objected when he learned what was in contemplation, but at the building department in Quincy, where he filed his protest, he was told he could do nothing. "Your only protection would have been in the operation of the zoning ordinance which was voted down at the polls," was what was added.

Another instance of what could Sunday evening, Dec. 5, in the Copley Theater, a concert of Negro Spirituals, by J. Rosamond Johnson and Taylor Gordon. and Taylor Gordon.

Monday evening, Dec. 6, in Symphony Hall, a concert by the Detroit Symphony Orchestra, Ossip Gabrilowitsch, conductor. The program includes Beethoven's Overture "Leonora" No. 3, Schumann's Fourth Symphony, Bossi's "Intermezzi Goldoniani" for strings, Chausson's tone poem, "Viviane," and Rimsky-Korsakoff's Spanish Caprice.

Another instance of what could happen in Wollaston at any time and in practically any section of the city, unprotected as it yet is by any restrictions, is the changing of a single-residence home into an apartment house. Ordinary rooms were halved and made two while the kitchenettes were the former clothes closets, stripped of hooks, then shelved and stripped of hooks, then sh a small gas stove installed.

Rhode Island Branch to Ob-What Happened to One Building At the corner of two residential streets, a dwelling house was sold. The new owners proposed to move the building to a vacant lot in ancial)-General celebration, Sunday, Jan. 16, throughout Rhode Island, of other street near by and then erect on the seventh anniversary of constitu-

posed store building could not be built on the street line owing to a 20-foot set back restriction provision. The new owners tried in vain to have the restriction removed and finally the plan was abandoned and the constinal owner resumed possession of

the plan was abandoned and the original owner resumed possession of his house.

These illustrations are related in Quincy as examples of many such transactions which have taken place all over the city and which are liable to continue to occur until the citito continue to occur until the citizens' zoning committee reports the new plan for residential, commercial and industrial restrictions, which it is framing, to the City Council, and it is enacted into law.

"Some of the real estate men here objected to the first zoning law to be passed" said a Quincy business man who has interested himself in the situation. "They were largely instrumental in its defeat before the people. Then the people found what zoning regulations really mean and since the zoning ordinance went down at the polls the real estate business in Quincy, so far as homebuilding is concerned, has not been active. Now, from all parts of the city and from these real estate men comes the demand for soning regulations which will protect ho yet be fair to all interests."

Cambridge, has been sold for Samuel The building has been under con- Broadbent to E. Miller. There were struction since early spring. It is eight stories high and will have a capacity for 1600 cars.

Among the features of what is said lot six, Newell Road, Auburndale, to

the Park Square corner of the build-ing through the street floor to Stuart Street, making it possible for auto-mobiles to enter or leave the garage from either side. Along the sides of this arcade will be located service stations for dispensing gasoline and oil and for booking orders for greasing, automobile painting, tire, battery and other service, or for the pur-

chase of supplies. Access to the upper floors will be provided by means of the Joslin straight ramps. These ramps will make possible the handling of 200 cars an hour without delay or jam ming at the entrance or within the garage. Two sets of ramps are pro-vided for up traffic and two sets to handle the downward traffic.

In addition to the 28 shops facing

accessory store. The lobby is finished in marble, bronze and plate glass and is comparable to the lobbies of the finest hotels and theaters. In this lobby will be the service bureau, cashier's office, passenger elevators and other arrangements for the convenience of the patrons. Entrance to the lobby will be from Eliot Street and Broadway.

Reasons why the Government should nurschase Case Government should nurschase.

should purchase Cape Cod Canal were advanced by Charles L. Gif-ford (R.), Representative from Massachusetts, at a recent meeting of the Cape Cod Real Estate Board. The bill comes up on Dec. 21, Mr. Gifford said, urging every member of the board to lend his influence in getting the project passed. He also urged the board to join with the Cape Cod Chamber of Commerce in going before the Harbor Land Com-mittee at the Massachusetts State House for an appropriation for the Cape Cod harbors.

Forris W. Norris, president of the board, also emphasized the need of an appropriation from the Legislature for the improvement of the harbors. Mr. Norris was re-elected president. Other officers elected were: M. Burton Baker, first vice-president; Herbert L. Chipman, second vicepresident; Einathan Eldridge, third vice-president; Walter B. Chase, treasurer, and Frederick G. ### SUPPORT OF COURT

President Coolidge Notified by State Federation

The prevailing sentiment of the Massachusetts Federation of Churches against dropping of negotiations for the adhesion of the United States to the World Court has been conveyed to President Coolunanimously adopted by a rising vote at the twenty-third annual meet-ing of the federation held in Ster-

that the resolutions were the more significant because in substance they had been transmitted in advance to all of the 150 denominational delegates and because those regarding the World Court and the League of Nations had been similarly pre-sented and adopted in 1925.

The resolutions set forth, in addition to the major premise, that the United States should so interpret its neutral rights of private trade in munitions of war as not to become the accomplice of any aggressor na-tion; and should join with other nations in declaring aggressive war, thus defined, a crime under the law of nations. They reaffirmed the practically unanimous sentiment of the churches of the federation for continued adherence to the Permanent Court of International Justice and again asked Congress to consider the relation of the United States to the League of Nations in order that an organized world may lead to a higher civilization.

### DR. MURRAY URGES LEAGUE PUBLICITY

Says Press Neglects Worth-While Events at Geneva

Complaining that too few of the the League of Nations ever got into the newspapers, but that trivial and sensational happenings of the day at Geneva were too often printed as news, Prof. Gilbert Murray of Oxford, who is the first incumb the Charles Eliot Norton chair at Harvard, addressed the Massachusetts branch of the League of Nations Nonpartisan Association at a dinner in his honor at the Univer-sity Club last night.

Professor Murray was introduced by Prof. Bliss Perry of Harvard, as president of the League of Nations Union of England. Professor Murray said that while the work being accomplished by the Council and the Secretariat has tended to build up a feeling of friendship and sym-pathy unique in the history of arbi-tration and diplomacy, it is too seldom mentioned in the newspa

### MORE PERSONS NOW EMPLOYED

Report Shows 246,791 Get Total Weekly Wage in State of \$5,980,791

Small increases in employment and in the aggregate pay rolls of Massachusetts industries, although with some reduction in average weekly earnings of individual workers, has taken place since Sept. 15, according to the monthly survey of employment issued today by the Massachusetts Department of Labor and Industries.

Returns from 1063 establishments on Oct. 15 showed 246,791 persons mployed and receiving aggregate weekly wages of \$5,980,791, an average of \$24.23 per worker. This embodied an addition of approximately 2200 workers to the payroll over the employment figures of the preceding month. The decrease in average weekly earnings during the month was 12 cents.

There has been a continuous increase in employment from month to month beginning with the returns for August, 1926. The improvement noted in October, 1926, was not as marker, however, as that noted in October, 1925, when employment increased 2.6 per cent over the previ-ous September. The summary data illustrate general conditions, the re-port says, but certain important News, Va. His command embraces are noted. changes within individual industries

### NATIONAL PARK HEADS CONFER

Nineteen Outline Needs as Guide to Appropriation of Funds

Special from Monitor Bureau WASHINGTON, Nov. 19-Superinendents of 19 national parks were called into conference by Louis C. committee of the House Appropriations Committee, handling Interior Department appropriations, to present information on individual park departments, for use in making appropriation estimates.

This is the first time there has ben available for the Appropriation Committee a personal estimate of financial needs for each park area by the men who are actually on the ground and able to observe the need for additional funds for extension of park areas, improvement of roads and enlarging the educational work

of the national park service. The park executives are concluding the sessions of the Ninth Na these sesions, administrative and been discussed and contacts have established with various government agencies whose work affects the park

Seek Funds to Ald Tourists It was pointed out to Mr. Cramton by executives and field agents of the park service that the mounting tide of student and tourist travel necessitates addition to the Yellowstone and other areas and that funds necessary to enlarge tourist

facilities. Consideration has been given during the sessions of the conference to transportation facilities. No solution has yet been reached to the problem of maintaining adequate motorbus and automobile service by granting concessions, without incurring criticism of the independent companies. Officials of the National Park Service feel that the concessionaires, who are required to main tain adequate transportation facilities in both the "heavy" and "light' seasons, would be unable to render this service unless they are assured

against indiscriminate competition. One of the most important phases tration is development of the educational facilities of the parks. Plans were laid during the conferences for increasing the number of guides" who take groups of students along typical park trails and of exwho lecture in hotels and tourist camps.

Hopes to Establish Museums Stephen T. Mather, director of the park service, hopes to install this educational service in every park and tie and Nat W. Niles

to establish numerous museums which can be used as "nature laboratories" by students and tour-

ists.
Ansel F. Hall, chief park naturalist of the National park service, talked to the park directors on the estab lishment of "Nature trails" and out-growth of the educational program which has been tried out successfully during the past year in Yellowstone, Yosemite, Mount Rainier and Grand Canyon National Parks. These trails are labeled with all the geological data available and with infor-mation regarding birds, trees and in the region. Their extension is made imperative by the lack of enough naturalist guides to fur-Cramton (R.), Representative from nish information to thousands of visitors who throng to the parks daily workers in mills with a short sched-

### ALIEN PROPERTY ISSUE LINKED WITH DAWES PLAN PAYMENTS

Views of Leon Fraser, Counsel to Agent-General on Reparations, Welcomed by Proponents of "Treasury Plan" of \$100,000,000 Aid Fund From Congress

Special from Monitor Bureau
WASHINGTON, Nov. 19—Plans for the problem. These he outlined as settlement of the alien property controversy that did not consider the Dawes plan and its problems were held improbable of success by Leon Fraser, general counsel for S. Parker

WASHINGTON, Nov. 19-A ser-This view was given in discussing United States to return the propgeant and two privates of the United States Army, all of them very smart and Means Committee, engaged in a public hearing on the question of preparing legislation to dispose of the alien property issue. Mr. Fraser, who is in America on a vacation, advised the committee that he appeared, in an unofficial capacity, on the invitation of William R. Green (R.).

Gibert, agent general for reparations

Representative from Iowa, chairman of the committee. The witness emphasized the fact that any plan which undertook a direct or separate settlement with Germany, without considering the Dawes plan, would endanger that plan, which, he declared, was operating with great success and under which, Germany was meeting her reparations payments promptly.

Divergence of Opinion street in close formation and disappeared rhythmically in the open spaces beyond the White House. Mr. Fraser's testimony was highly pleasing to the proponents of the so-What had they obtained in the White called treasury plan. The settlement proposal, outlined by Garrard B. Chicago' in a weekly magazine give the impression that they are whisky propaganda. So general is propapropaganda. So general is propaganda for the return of the liquor traffic that it amounts to a national scandal. There is only one way to meet it, and that is for all people "The shootings started three years" meet it, and that is for all people

Municipal Court of Chicago, said this as he sat in his offices in the Chicago City Hall with a recent copy of the weekly in question before him. The Municipal Court of this city is there are no illegal breweries operating and some control of the line and no hear to be had to fight. Harry Olson, chief justice of the the largest civil court in the world. It enters more judgments than all the state courts in Illinois. Judge Olson was its first chief justice and he has served continuously in this

office for nearly 20 years.

The press as well as the magazines drew Judge Olsen's critical omment for their openness to the liquor propaganda. He pointed out its influence in motion pictures where drinking scenes are flaunted where drinking scenes are naunted before the public. "This same propa-ganda," he added, "runs through the theaters. Almost every play has a drinking scene where 'prohibited whisky' is passed around. It is not the genuine article or the players could not finish the play.

will never be repealed. The laboring man now goes to the bank with his veek's savings. His wife her Expects Victory of Dry Law week's savings. His wife has a new hat when she wants it. The children

"The only increase of crime due to the Prohibition Law is that which results from the activities of the bootleggers," Judge Olson continued.

into oblivion, also took exception to the magazine's exclamation. "I don't think it's fair to call us 'poisoned,' as he remarked rather whimsically: "I don't think we are as much poisoned "Other types of crime have been as before prohibition."

Whisky Point once faced the work-

ica. The Citizens' Association of Chicago has rendered such notable services to the city as to law clear.

"No just basis exists for any such holesale arraignment," said Shelby M. Singleton, its secretary. "Chicago, in the first place, is not the worst city

of cases from the Nation's second the way to a real result."

The Committee of Fifte tinually through the federal courts of Chicago's civic organizations, here. When Edwin A. Olson, the fed-makes its fight on vice. "The preva-

enforcing prohibition in Chicago."

Mr. Olson glanced at the magazine article. "I read it when it came out," he remarked. He ran down the crime, Morgan A. Collins, Superincolumn to the passage citing de-plorable conditions in Chicago un-der a previous régime. "That was true before I came in," Mr. Olson ob-served. "But that was nearly four years. The bad people are annihilat-

Feuds Not Caused by Liquor

against it to unite for a sober and or so ago when the Federal Government started closing the breweries.

The beer runners who had been get-Constitution, and I think they are strong enough to overcome the liquor shut up began stealing beer from propaganda now apparent on all beer runners operating out of the breweries we had not yet been able to get around to.

"What little beer they get today is from the small wildcat breweries and even at that, 99 per cent of the beer being sold in Chicago is near-beer and some beer which has been

'needled' by ether or alcohol.
"After we closed the brewerles, beer was shipped in from the out-side, but we indicted some of the portation of beer, is right now serv-ing a jail sentence and another Chicago policeman charged with the same offense is awaiting trial.

Miss Mary E. McDowell, Chicago's hat when she wants it. The children commissioner of Public Welfare, reperity of the country since the Volstead Act is due to that act more than any other one factor.

"The only increase of crime due

ever, the limited space that makes headline writing a craft was used by the editor to cry his wares as a "viyid story of the most amazing corruption that ever darkened the name of an American city."

Among the several civic bodies in Chicago whose business it is to watch political corruption, one is the oldest civic reform organization in American civicant of the color of the color of the color of the century france. The Citizens' Association of Chi-

due to the city being 'poisoned by prohibition.' Politically the city is in things like these are as noticeable as other changes that may be seen. When we have a really earnest effort. The United States Attorney at Chicago is one of the chief law enforcing officials of the country. A multitude homes, then I think we shall be on mean racial confusion.

The Committee of Fifteen, another prosecutor, took office nearly lence of vice and crime in Chicago years ago the courts were has been due to the prohibition law," clogged with cases. He cleaned them wrote William G. Shepherd, and the "Do you think that 'prohibition has poisoned Chicago'?" Mr. Olson was asked.

"Of course prohibition has not poisoned Chicago," he responded. "We find it easier to enforce the prohibition law than the narcotic law. As far the United States Attorney's Office is concerned, we have no trouble in enforcing prohibition in Chicago."

Mr. Olson glanced at the magazine magazine he wrote for set that sentence in capitals. Leslie L. Lewis, acting superintendent of the committee, took one look at the capitals and vice in Chicago than there has ever been. This is proven by our charts and records and by comparison with the investigations from year to year. If prohibition has done anything in its relation to the vice situation it has been to decrease vice." magazine he wrote for set that sen-

### A Paris Causerie

the French and the English as a link between their two lands and their two cultures. For this reason the opening of the Canadian Hostel in the Cité Universitaire by the Prince of Wales was an event which aroused the greatest interest. It is, indeed, an event which is interesting from many points of view. In the first place, it is already remarkable that genuine efforts are being made to help the Paris students, whether he be of French or foreign nationality. His lot had been rendered harder since the war by the shortage of accommodation. The Latin Quarter was once a pleasant place in which living was easy, and with a comparatively few francs a month it was possible to be lodged and to fare well in the cheap restaurants around the Sorbonne. But the student was severely hit, not only by the shirnkage of available houseroom. Paris is overcrowded, and to find a decent apertment in a modest hotel at reasonable charges became a task of real difficulty, There were

CHICAGO—"Articles such as the laked. "Is prohibition the cause of the monitor bulldings, for they, too, are included in the military zone. Large spaces were neglected, and Paris was denied the right to expand, because, since the fortifications were bullt under Louis-Philippe, the military authorities would permit no tary authorities would permit no permanent buildings within 200 yards of the wall which inclosed Paris. The walls are thrown down, the bastions are leveled, and a flourishing suburban ring is springing up around the metropolis. Building on these spaces is subjected to careful regulations, fo it is the intention of the counselors to have no dreary expanse of brick and mortar, but a pleasantly diversified suburban area Here, then, arises the Cité Universitaire, which is a sort of annex, south of the Seine, to the Latin Quarter.

Lets for Other Countries ing and no beer to be had to fight over.

"What little heer they get today is den and Brazil and Japan and any other countries that desire to avail themselves of the facilities thus of-fered. There may be altogether, when all the houses of this students' town are built, 5000 scholars living together on the old fortifications, but

the precise numbers, great or small, do not much matter. What I like to think of is the development of this think of is the development of this international fam in education; the prohibition department reports no beer coming in now. One Chicago police lieutenant who aided the impact of the same purposes, and learning much more than tacts, and learning much more than the mere acquirement of formal knowledge—learning, above all, to know and appreciate each other, and joined together by the nexus of a common scholasticism. They are not to be segregated. Whether Latin or Anglo-Saxon culture is the better is of no importance: what is of importance is that we see the beginnings of a universal culture. Who can doubt that when the students return to their own countries, they will be in some sense missionaries of gen-erous ideals, and will vastly help toward wider and closer understandings? This is, I believe, the profound promise of the Cité Universitaire, which has become, and will become

"We would not think of abandoning the use of the automobile because it can be used to facilitate the commission of crime. Neither would we abolish the Volstead Act because one of its by-products is the bootlegger and his crimes."

Though newspaper headline writers have frequently been criticized for their exaggerations, the magazine writer of scare heads has escaped such strictures. In the article to which Judge Olson referred, however, the limited space that makes as always and the weight of their way home down the limited space that makes are wended their way home down the limited space that makes are weight of their exaggerations, the magazine writing a craft was used the work-which increased the work-which always another stockyards institution. Its odorous identity lay farther north near "Bubbly Creek," In this "back of the yards" district may be found the University of Chicago settlement, over which Miss McDowell, one of Chicago's most noted women, has presided for 32 years. It is located in the heart of a Polish settlement.

Shouting and shooting, squads of Poles wended their way home down still more, a symbol, a portent, that on the field of intellectual and humanitarian studies a reconciliation of peoples in mutual esteem and sympathy may be effected. Example of Racial Fusion It is fitting that the French hostel should be the first-to be inaugurated and the Canadian hostel the second For Canada is a hyphen between Anglo-Saxon culture and French culture. However Canada may be looked upon in America, it is cer-tain that in Europe it is regarded as French as well as British in

political corruption, one of the citizens' Association of Chica. The Citizens' Association of Chicago has rendered such notable services to the city as to lay claim to its respect and confidence.

Retire Political Condition

Settlement and doors to watch those who wanted admission. So many were the callers who came to get patched up after a brawl that the settlement had to draw the line on such Sunday company.

Settlement and doors to watch those it is full of quaint old words that have been almost forgotten in France. Nothing is more fascinating for one who was acquainted with the modern French tongue than to fear Canadian French. Again, Canadian French. alley on Saturday nights, and we haven't needed to put special watchers at the doors since probabilities. in America. Temporarily it is in a haven't needed to put special watch-bad state politically, but this is not due to the city being 'poisoned by due to the city being 'poisoned by this like these are as noticeable as old-time French customs. Canada noticeable as old-time French customs. Canada noticeable as old-time french customs.

short, British as it is in sentiment and administration, offers an illumi-

A British Institute

One important result of this inauguration is the movement for the establishment of a British Institute in Paris. Every British lover of France and every French lover of England hopes that the proposal will be crowned with success. There has been much talk in recent years of a Franco-German rapprochement, and indeed with a Franco-German rapprochement now perhaps a fait accompli, European peace is fortified. But let it not be forgotten that, although it has been necessary to lay emphasis on this aspect of international relations, the corner stone of European peace must continue to be a Franco-British entente cordiale. Anything which fosters the entente is to be commended. Therefore the British Institute in Paris is to be commended. The plan, as it has shaped itself, is that the British Institute should consist of two parts There should first be an enlarged form of a British institution which already exists in Paris—the Interyears ago. We haven't any such situation here now."

"But what of these gang feuds?"

The bad people are annihilating each other and the good people are surviving. The streets of Chicago are as safe as the streets of any other the United States Attorney was big city."

Years. The bad people are annihilating form of a British institution which already exists in Paris—the International Guild which has already one excellent work. There should, done excellent work. There should, second, be a British college to be built in the Cité Universitaire by the side of the national residential hostels. The guild and the college to-gether compose the institute. The International Guild was founded Paris

will nominate William G. McAdoo for the presidency in 1928, it is be-lieved by Edwin T. Meredith, Secre-

Democrats from the West and pianist, will assist Professor Mar-South." The platform will not be wet shall in his musical illustrations. and undoubtedly will include in its declaration of party policy and program will come to listeners through the courtesy of W. S. gram a prohibition law enforcement Quinby.

Doubts Smith Nomination "This country is dry today. I do not believe that Governor Smith consistently could run on the sort of a platform the 1928 convention is most likely to adopt."

Mr. McAdoo, he said, would be "the rallying point," for the Progressives in the 1928 convention.
"He is the only man within our. party around whom any considerable group of 'progressives,' a majority of whom also happen to be drys, would gather to make their stand against the wets and what they re-

gard as the 'reactionary' East."

Mr. Meredith said he thought Mr. McAdoo's relative strength would be 'about the same" as in 1924. He "sincerely hopes" introduction of Mr. McAdoo's name will not bring about a repetition of the 1924 deadlock, which required 103 ballots to break.

"Interesting Convention" Expected "However," Mr. Meredith, re-marked, "I expect it to be an inter-

The convention will without a doubt be held somewhere in the Middle West, in Mr. Meredith's opinion. "Cleveland, St. Louis, or possibly Kansas City," he suggested. He was certain it will not be held in New York.

Governor Smith's recent election for a fourth term in his State "has undoubtedly strengthened him." in the opinion of Mr. Meredith, but not enough to overcome sentiment against him. The New York World, an ardent supporter of Governor Smith, considers the Meredith pronouncement a move to counter momentum acquired by Governor Smith in his re-election to a fourth term.

#### COMPOSER TO HEAR PREMIERE BY RADIO

#### Eiffel Tower Set to Tune-In Boston Symphony Concert

The French Government radio station FL. located in the Eiffel Tower in Paris, will endeavor to pick up the sixth of the series of Saturday night concerts by the Boston Svien. long-distance points on his private station built especially for foreign reception. The Adelaide station once RERADIOCAST inquired by radio how he was getting them and he has been in comnication with several of these sta-FAR PROGRAMS tions as to receptivity.

Late in August he received a cable-gram from the Adelaide station which Short-Wave Station in San cost the senders \$32, asking him to arrange for the reradiocasting in this country over KFI and KGO of Los Angeles of an all-American program given from 7:30 p. m. to 1:30 a. m. Sept. 1, 2 and 3. Investigation by these stations proved Moskovita's receptivity all that was required, but LONG BEACH, Calif. (Special Coron the night of the test the United respondence)—International fellow: States battle fleet was coming into

silent. The Australians profess a strong desire to have their programs heard in this country and radio ex-perts declare it is entirely possible. year.

Mr. Moskovita through the past summer has frequently received programs from 2BL, Sydney; 4QG, Brisbane; 3LO, Melbourne: 5CL.

ONE COMPANY FOR JAPAN WASHINGTON, Nov. 20-The radiocasting companies of Japan have decided to join their interests in the formation of one company which will control radiocasting in the country, according to a report to the Department of Commerce from Commercial Attaché Herring at Tokyo. A number of those in Japan who are interested in radio are of the opinion that the move was directed and guided by the Government, thus signifying the desire of the Communications Department to control radiocasting in

Japan. Registered at the Christian Science Publishing House

### LAND REFORM STATUS SHOWN

distributed to serve as a means of subsistence. A total of 738,085 stremmes of territory, chiefly consisting of pasture land, has been ceded to co-operative agriculturists to serve as land for common use.

ATHENS (Special Correspondational Correspondations) Dr. C. Evelpides on agraviant per lot. To this is added a sum of the land varies considerably in different regions, being on an average rated at 37 drachmas per stremme and 2625.5 drachmas per stremme and 2625.5 drachmas per lot. To this is added a sum of Greek Agrarian Discusses

ence)-Dr. C. Evelpides, an agrarian per lot. To this is added a sum of engineer, in a booklet on land reform in Greece, discusses the status of ing. Besides this there is the interengineer, in a booklet on land reform in Greece, discusses the status of the work of colonization and surveying. Besides this there is the interthe land, which has assumed increased importance because of the cultivator, which doubles the to the cultivator, which doubles the properties of the cultivator, which doubles the cultivator. great numbers of refugees suddenly initial debt to the Treasury of the thrown upon the mother country.

Forceful expropriation of big landed properties, with a view to creating small holdings, was authorized by the Greek National Assembly after the military revolution of 1909, which, however, was not enforced until the Revolution of Saloniki in 1917. By a further act of Parliament in 1923 it was decided that expro-priation should be carried out without causing loss to the landlords. Land Status

The actual land status in Greece is traced back to the era of the Roman dominion and the decadence of the Byzantine Empire, when various lords and despots managed to usurp the land. On the eve of the Turkish conquest the major part of the Greek territories were in the possession of the state, the despots, and the church, especially the monasteries. These lands were cultivated by serfs. They and their families were bliged to live on the land of their birth and whenever the property was sold they were included in the transaction. Besides these there were free cultivators, especially in the mountainous regions, who were denied the protection of their lords, and were subject to onerous duties and forced labor.

The Turks at first respected the existing land status and lent assist-ance especially to small farms, which in return were made subject to a taxation amounting to a double tithe. But the crown lands, and those of the Greek despots who had refused submission, were confiscated and in-corporated in the state properties. Regional military chiefs and tax collectors, by violence and by lending small or large sums to Greek small owners, succeeded in appropriating much of the villagers' land. Land Given to Church

To get rid of these oppresions, many of the peasants turned their lands over to the monasteries, only preserving to themselves the right to cultivate them and enjoy part of their produce. In this way the vast monastic properties in Greece were

After the removal of the Turkish yoke, the Greek law recognized the absolute sovereignty of the proprietor on his land in conformity with the dispositions of the Roman law. In Thessaly, especially, the rights of the proprietors were reinforced by notably had in view the protection of the Turkish landlord. The situation of the cultivator was thereby rendered more precarious, as the landlord had the right to expel him from the land which he and his anestors had been cultivating for many generations.

National Lands

The Turks, during their domination, had concentrated the greater part of the best land in their own hands, employing the Greeks as their cultivators. These lands, after the cultivators. These lands, after the cultivators are also of the property of the president of the property of the ment under the name of national lands, and constituted two-thirds of ter. Were I a young man, a stranger, the cultivated and arable land of I would try to associate with young men known for their character and

Greece.

After the repartition of the crown lands, it was the small proprietors who generally dominated in Greece. The annexation of Thessaly to Greece, in 1882, again brought the land question to the front. This was followed by the occupation of Macedonia and Epirus in 1912, the largest part of the landed property in that area being owned by Turkish beys, and this again transformed Greece into a country of big promote the influence of the trustees. It Greece into a country of big pro-prietors. is to link up religion and the rail-roads, he said.

Farms in Greece

Before the application of the expropriation law enacted in 1918
Greece counted some 2259 his farms Greece counted some 2259 big farms, or "tchiffiks." These lands covered more than half the whole cultivated and arable land of the country. The properties declared alienable since 1917, up to Dec. 31, 1925, amounted as a moral issue.

A. T. Wright of Cedar Rapids, Ia.

1917, up to Dec. 31, 1925, amounted to 1496. The exploitation of these lands was provisionally ceded to 45,000 rural families.

The Commission of Expropriation has up to date taken over 264 big properties, mostly located in Thesaly, allocating 2,325,812 stremmes of land for direct cultivation. Twenty

here. A proviso declared that when it becomes true declared that when to accomplish some extensive object for the beenefit of its taxpayers, a policy of serial bonds should be favored, covering such period of time as would not exceed the life of the improvement for which the bonds were issued.

The association also indorsed President Coolidge's advocacy of reduction in taxes, both federal and state. Boston was selected as the next meeting place. Joseph T. Tracy of Columbus, O., was elected president and Vincent Carter of Cheyenne, Wyo., was re-elected secretary.

#### TEXAS RAIL PERMIT GIVEN TWO SYSTEMS

Long Contest on Building Is Decided by I. C. C.

WASHINGTON (P)-The long contest for the right to pioneer in extensive railroad construction in the south piains area of the Texas Panhandle has been won by the Chicago. Burlington & Quincy and the St. Louis-San Francisco systems. The Interstate Commerce Com-

mission authorized these two major

lines to build 229 miles of railroad at a cost of \$7,132,000, but ruled that raspberry farms. Yes, indeed, you'd unless they proceeded promptly with construction work, the Atchison. Topeka & Santa Fe, and the Texas, probably have been quite as happy Panhandle & Gulf Railroads, whose applications to build in the same territory were rejected, would be permitted to renew their requests.
Under the decision which came

several months after a commission examiner had submitted a report recommending approval of certain applications with many conditions, the Fort Worth & Denver, a sub sidiary of the Colorado & Southern Railway Company, which in turn is controlled by the Burlington, will be permitted to build 202 miles of line at an estimated cost of \$6,000,000.

### EXTEND CLOSING TIME

PHILADELPHIA (A)-The Sesquicentennial Exposition is to remain open one month longer than the original plans called for. To give the THE following incident occurred directors time to study the proposal Toy, and once more Peggy Jean was that the fair be operated again next summer the board has decided to extend the closing date from Dec. 1 to the supply of coal she had received

The action was taken after the dithe special committee appointed by Mayor W. Freeland Kendrick urging that the exposition be reopened in 1927. Members of the committee said "Something in there must have that the success of its plan depended to the success of its plan depended to the success of its plan depended upon the raising of \$6,000,000, of which it was suggested that \$2,000, of the state of concessionaires and exhibitors. In addition city council would be expected to supply \$500,000 to police and safeguard the grounds and buildings and make such repairs as would be necessary next year.

Dr. Barclay, a gaunt active Scotssentiment regarding proposed night man, first took up work in the Far deliveries of merchandise in the city, East in 1875. He has known Formosa as a Chinese colony and since 1895 as a Japanese dependency. "Outward smiled his appreciation for such a York is distributing a questionnaire conditions have completely changed, he told a representative of The Christian Science Monitor, "and though perhaps it would not be correct to say that the Formosans love the Japanese, the latter have given them good, if autocratic gover and have brought security to life and property, a security which cer-tainly was not evident when I first knew the island. There is also a fine system of elementary education, and the first Formosan graduate of a Japanese university, Mr. Lim Bo-seng, son of one of our pastors, is shortly being sent to England for further study."

Forty thousand copies of the New Testament of the Chinese dialect spoken in Formosa, printed in Ro-man characters, have been sold since Dr. Barclay revised it 15 years ago. "In our church membership nearly 10,000 are Romanized Chinese, and only 1800 can read the ordinary Chinese characters. My new task is to evise the Old Testament, and as the other work took me two years, I estimate that I have at least five years' work before me. I confess that I have, in preparation for the task, been rubbing up my Hebrew during my holiday in Glasgow since last March.

Dr. Barclay does not expect to carry out much of the work in For-mosa itself, although he will pay a visit to his old station there. "In visit to his old station there. "In Amoy almost the identical dialect is spoken," he explained, "and I shall make this my center as I am more likely to be uninterrupted with claims for assistance from my old colleagues which it would be hard

Paper Barrels—Now that paper has been found useful and eco-nomical even for milk bottles, it is not surprising that a leak-proof paper barrel has been devised.

Boston, Mass., in the church edifice, later occasion, a German

The lecturer was introduced by Judge Samuel W. Greene, C. S., First Reader in The Mother Church, who

Friends: In a period of important discoveries, inventions, and developments, what could be of more interest to man than the discovery of a of God? Man's hope for eternal life rests upon a proper understanding of God. Jesus of Nazareth said, "And this is life eternal, that they might know Thee, the only true God, and Jesus Christ, whom Thou hast sent." Christian Science is unfolding to man's consciousness the true concept of God, and Christian Scientists are daily proving its availability to meet human needs. Our lecturer this evening will tell us something of this discovery, and of its practical

Graham, C. S. B., of Boston.

The lecturer spoke substantially as like his Father, God, it follows

in the sacred Volume, becomes il-lumined. This illumination gives one ure of their understanding and faithan apprehension of good not previously experienced. By good we will to multitudes the consciousness and understand, humanly, anything and the enjoyment of good. everything which makes for righteous peace and harmony between individuals and nations and between mankind and God. And the main Mrs. Eddy writes: "Christ's Chrisreasoning and concrete illustrations, how it is that Christian Science, being the outcome of good, confesses its kinship to and its points of contact with that stream of Truth, flowing through the ages, which makes for righteousness. That stream is the forman that stream is

Mary Baker Eddy, the Discoverer Scriptures," has given us, on page 587 of that volume, a definition of the word good, namely: "God; Spirit; omnipotence; omniscience; omni-presence; omni-action." That she is justified in so defining good is proved by the fact that in more than which makes the Jewish and Christwenty languages the term God and tian writings into a mosaic of har-good are identical in their derivations. Everything that is Godlike is good and everything that is good its origin in God. It follows that all things having their origin in God are in harmony with one another, at neace among themselves. Hence

Jesus identi- (Science and Health, p. 589). In him the end of error, because even huever-present good. Jesus identified goodness with God. The people goodness remains good though beset man invention must have its day, and by the claim of the most malignant we want that day to be succeeded by charge above the temptation.

Truth's Application Good always manifests itself. Inasmuch as God hath "left not himself without witness" in any nation and in every nation he that feareth Him and worketh righteousness is accepted with Him, it follows that heathen and pagan lands are not en-tirely bereft of heavenly aspirations of Confucius, in the wise and noble statements of Socrates, and in the lofty and humane sayings of Marcus Aurelius are caught glimpses of eternal good. These representatives of pre-Christian times were seekers after good-God; and Christian Sciwhich is the all-embracing truth, takes note of their endeavors to know God. Even the Jews saw od in the Roman Centurion and said of him: "He loveth our nation, and he hath built us synagogue." And Jesus, by his act acknowledged the truth of the statement. Under the influence of Christianity good's

The Wider View

pices of The Mother Church, The his German captors was large-First Church of Christ, Scientist, in hearted enough to tell how, on a Demonstrati Falmouth, Norway, and St. Paul treated him with tender consideration. In that act both these me saw God and manifested God-good. When that courtly gentleman, A. Bronson Alcott, went out of his way to speak a word of cheer and comact Mr. Alcott saw God, and revealed God-good. Deep down in the roots of human experience, underlying all superficial phenomena, is a tie that binds all men together. It is foreign to no peoples, to no age. It is the unity,-the oneness,-of good. And the pre-eminent work of Christian Science is to awaken this seemingly slumbering sense of good into loving activity and fuller recognition.

Christian Science Healing This awakening from the dream of self-righteousness and sickness and sin to the experience and appreciation of good, comes through Chris-I am happy to present to you a tian Science healing. It is God, workmember of the Board of Lectureship ing in one's thought, both giving one of this Church, the Rev. Andrew J. the desire for good and the ability to realize it. Another Point of Approach On page 271 of Science and Health reappearing in all ages, maintaining its obvious correspondence with the Scriptures and uniting all periods in the design of God." This is not only a forever coming of the Christ, wont to call the philosophy of history. Like the pearl diver who with a prize, so Mrs. Eddy, in lonely and the author of its textbook, "Sci- and consecrated endeavor, plunged beneath so-called material causation

Let us now consider four high points in religious history and observe how their roots intertwine:

(a) The great declaration.-The there is a unity of good which can first verses of the book called Genenever be broken. Neither time nor sis constitute the most tremendous space, race nor color, academics nor statement ever voiced by man. It is creeds can shatter this ageless, spir- the supreme record of all time. Note how the inspired writer, disregarding transitional journey from human esteem. In hymn 23, in singing of Mrs. Eddy writes, "As an active all introductory matter and apportion of one stupendous whole, proaches, launches at once into the proaches at once in goodness identifies man with universal good" (Miscellany, p. 165).

An unselfish word or deed is evidence that a manufacture of the second of dence that a man is to that extent and there was light. . . And God in touch with God. God is omnissaid, Let us make man in our image,

presence, therefore good is omniafter our likeness.... So God present. mage of God created he him; male The Old Testament prophet inquired, "Canst thou by searching find out God?" The very manner of asking makes the reply negative. And God saw every thing that he made, and, behold, it was very good." In these lines we find only of evil. In these lines we find only of evil. The Principle of good alone operates.

(b) The great deliverance.-Fifteen hundred years before the Chrisof the existence of the material sun tian era, the great emancipator, rise to the height of poetry. Her Moses, had seen far enough into the life disproves Schlegel's dictum, that "Provide me now a man that can substance of good to be able to deliver three million Hebrew slaves from their oppressors, by making the passage of the Red Sea. This incident has passed down in history as a mirmystery concerning God which has acle, or, according to popular belief, the temporary suspension of law. But this is not an instance of the annulment of law, but of the normal ness in nature and has a deeper eneffect of the activity of the law of joyment in beauty than he had before good, ceaselessly operating in God's creation.

became to them a living reality.

Christian Science, recognizing the unity of good, acclaims this fact whenever and wherever manifested, and makes the gracious acts and victories of Jesus attainable by all.

Truth's Application

Truth's App naughty world and then the law of good began to be forgotten and the propagation of ecclesiastical Christianity was carried on, very largely, through degma and by fire and sword. But never, in any age, was the law of God without its witness.

of God without its witness. never conquers through the use of earthly weapons, whether it be the human will or material sword.

Through contains of derkness many Through centuries of darkness many were the promises of dawn. But the advent of day came slowly on. When, in 1866, Mary Baker Eddy confidently proclaimed her great discovery of the unity and eternity and activity of all good, that truth had not dawned as a poet, John G. Whittier, who contribudden revelation, but came after utes eight hymns, was healed of inmany years of mental labor and spiritual struggles. Then began to be realized, in a larger measure, among men, the words of the poet

A lady with a lamp shall stand In the great history of the land A noble type of good heroic woman-hood."

Demonstration by the Church

The unifying influences among mankind are not those which are speedily evident to the superficial observer. Rather are they the hidden forces lying beneath the mafort to Mary Baker Eddy when all terial surface of things, which rethe world seemed against her, in that | veal themselves only to the calm and earnest thought. In this way the Christian Science movement is bringing to mankind the fundamental activity which is gradually unifying individuals and nations in bonds of good. This church is numbers and influence. Its membership is composed almost entirely of men and women whose former beliefs, convictions, and habits of life were diametrically opposed to one another. The agnostic, the infidel, the materialist, the creed-bound Christian, and the ethical religionist have all been brought together through this unity of good as presented in the teaching and demon stration of Christian Science.

Personal Gratitude

Christian Science, I was at once lifted into a realm of thought larger 128: than I had ever before experienced. As I began to study the literature of Christian Science it was a joy to me to learn that its teaching constituted no local or temporal religion, as to appreciation of good. I saw that like Jesus it spoke in universal terms; that is, was calm, gracious, patient and loving, appreciative of every manifestation of goodness wherever seen. As page after page of Mrs. mankind and God. And the main Mrs. Eddy writes: "Christ's Christ Eddy's consecrated life unfolded to purpose of this lecture is to show, by tianity is the chain of scientific being me and her tenderness and earnestness in the face of injustice and oitter opposition became apparent, I knew that she, like her Master, had tasted of that universal good which must in time make the whole world

kin.
This understanding enabled Mrs. Eddy to state, clearly, the truth already declared, that man, made in plunges beneath the water and rises God's image and likeness, remains forever intact. Nor can that image ever be wholly obscured by the mists of sickness and sin. It is this unchangeableness of God's likeness in man to which Christian Science sion of the eternal kinship of all holds, which enables Christian Sciengood. She alone of all who have tists to recognize the manifestation written commentaries on the Bible of good everywhere. This certainly was the mental attitude of Jesus. He loved all men without condoning their unrighteous habits or accept ing their false systems of thought He saw good in the publican, in the Magdalene, in the man born blind, in the thief on the cross, and even in those who crucified him. This insight of Jesus is ours by inheritance. It is our privilege and our duty to see and to appreciate good, every day.

Broad Culture

of dawn. Christian Science is the full radiance of the day. Musicians and poets have wonderful opportunities to express good.

Appreciation Not Depreciation Appreciation of good in others

does not mean depreciation of self. The acknowledgment of excellency and of truth in another does not mean the relinquishment of the fundamental tenets of one's own conviction. To appreciate good and desirable qualities in others is a mater of common honesty. To be false to what one knows to be the truth s little short of a crime.

The forever fact which no Christian Scientist can compromise and con-

Plea for Christian Unity

A child had wandered out into the vastness of a Canadian wheat-field and was lost. The parents joined by neighbors from all the adjoining countryside organized a search. Each one went his own way and there was much retracing of steps and duplication of effort. Finally it was suggested that they all join hands and go out. Then the child was found. The foregoing incident, based on fact, was used by Miss Dalsy Butcher in an appeal for a united church before the youth convention in connection with the international session of the Disciples of Christ in Memphis. She continued:

Christ in Memphis. She continued:

Christ in Memphis. She continued:

"The old issues which are dividing religious people are almost all made of dead timber; the people who are holding on so tenaciously have forgotten what they were all about. We have thought in terms of divided Christendom so long that it is hard for us to think united or be Christian toward all other Christians. Thinkers all over they world are seeing that the

over the world are seeing that the

whole thing is wrong and we are all sharers in the wrong, but this must come into the experience of the whole church.

mean simply co-operation of the churches. This can be a big step toward Christian unity, but it may

not be Christian unity. The church of Christ today is facing

the same situation Paul found in the early church. Some are saying 'I am of Methodism,' some 'I am of Baptist communion,' and some are

saying again today, 'I am of Christ' in a denominational sense.'

The first two months of 1927 will witness a huge campaign initiated by the House of Bishops

of the Episcopal Church, to carry the teachings of "practical and militant Christianity" into every community in the United States.

According to present plans, the crusade will be one of the most extraordinary in its thoroughness ever attempted, and 100 of the church's foremost bishops, leading

priests and laymen (including

Bishops' Crusade.

has been called

Its promoters announce that it is not a campaign to raise money, to proselytize among members of other communions, nor even pri-

marily a movement to gain new members for the Episcopal Church. As defined by its leaders

it is a crusade to secure a new allegiance to the whole Christian

¶ For the first time in its long and famous history the recent graduation ceremonies of the University

of Edinburgh were marked by the conferring of the degree of Bachelor of Divinity on a woman. The principal, Sir Alfred Ewing, said that the number of women at

the university was rapidly grow-ing. Last year 1191 women and 3953 men matriculated, but this year the proportion is nearer one-

Although there remains much to be done, the outlook for the reunion of the Church of Sctoland and the United Free Church now

seems bright. Steady progress toward this goal has been made

within the last few years, and a point has now been reached, where the assemblies at their last meet-ings appointed committees of 100

members, which will prepare a basis of union.

mmittee of each church

The committee of each church has divided into sub-committees: one sub-committee is now at work on constitutional documents that

contain such matters as the doctrine of the church, discipline, and methods of government. Another committee is dealing with matters of the courts of the church, divi-

of the courts of the church, division into parishes, the functions
of assemblies and other cognate
matters. A third committee is
dealing with a manual of rules
and forms of procedure, while a
fourth is dealing with the relations of the proposed United
Church to other churches including such matters as the mutual
gligibility of ministers in various
churches with which the United
Church will establish or maintain
close relationship.

close relationship.

Christian Endeavor in Australia

Is not an invitation to join the church,
but an earnest effort to disnot the church, working along that line, because one day, becoming supersensitively hondividual thought to the Christ, Truth, est and examining my own thought, which is always active and always that is not against us is on our part."

Among the 27,636 Pieces of

# Fancy Linens

-in a Tremendous Pre-Holiday Selling That Affords Savings of 25% to 50%

MONDAY at nine, 27,636 pieces of specially selected Linens-all new, fresh and dainty-go on sale in a great offering that will provide a rare opportunity to purchase gifts for the bride, for the bride-to-be and for Christmas giving.

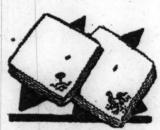

Hemstitched Linen Pillow Cases

Just received from Ireland this wonderful shipment of fully bleached, pure Irish linen pillow cases. It's a big shipment, but at this price they will go "like hot cakes," and we advise earliest possible shopping if you would avoid disappointment. Fine, soft-finished linen, the kind that will wear for years and years. What a pleasant gift surprise at much less than you had, perhaps, expected to pay.

Hemstitched

Twin Bed size 9.85 a pair Double Bed size 10.85 a pair Boxed one pair to a box

A purchase that makes a price record for pure linen sheets, and a thrilling value that women who love beautiful things cannot afford to miss. They will wear for years, a constant source of pride.

Madeira ' Sandwich or Beverage **Napkins** 

Napkins 7x7 inches, for serving with sandwiches or beverages-daintily calloped all around with embroidered corners in two patterns. The price is very much lower than we can regularly offer on napkins of this sort.

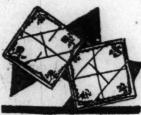

Hand-Embroidered Madeira

Table Cloths 36-Inch Round Cloths 3.48 ea.

54-Inch Round Cloths 6.68 ea-70-Inch Round Cloths 14.88 ea.

Every cloth made of 1690 count pure Irish linen, heavily embroidered in a choice of several very lovely designs, and scalloped edges in rose point pattern. A find indeed at these prices.

Fourteen Patterns in Madeira box

A phenomenal price for beautiful napkins of this sort—proving the wisdom of shopping for Christmas now. The linen is very fine and white, the embroidery done with consummate skill in a choice of fourteen designs with scalloped edges.

### Household Arts, Crafts and Decoration

### A Ceremonial Cap of the Sixteenth Century

Students of the development of embroidery in England during the sixteenth century, ascribe it to the Protestant Reformation. Previous to the change of church organization made by Henry VIII, women skilled in the use of the needle for decorative purposes had devoted their most residue. rative purposes had devoted their most assiduous efforts to the preparation of rich ecclesiastical pieces.

Naturally enough when the customs of centuries were thus abruptly and even violently overthrown, women sought an outlet for their talent and a means of livelihood, in the preparation of handsome garknows from historical records as well as from portraits of the period magnificent apparel, and the fashions he thus favored were eagerly followed by his courtiers, both men and women. Hence secular embroidery flourished mightily, and in which it was held was marked and intensified by pretty taste herself for gorgeous

personal adornment.

Not long after her accession she incorporated in the city of London in 1561 the Broderer's Company. This incorporation indicates the commercial importance which the craft of embroidery had already attained.

Spanish Embroidery There are two types of embroidery

characteristic of the Tudor period. The first is termed Spanish work and England by Catherine of Aragon, who was trained in this charmingly feminine art by her mother, Queen Isabella; and she, if tradition may be trusted, made her husband's shirts with her own fair hands

The Illustration shows an embroidered linen cap of this Spanish work, which was recently displayed at the Metropolitan Museum of Art. It is round in shape and has a flat brim or bandeau not unlike a close-fitting turned-back cuff; it is edged with metal lace and spangles. Not many specimens of this em-

### A Dinner for Five People

Breaded Chops

AVE slices of lamb or veal cut from the leg, about one-third of an inch thick. Remove all pieces for serving. Season with salt and pepper. Dip each piece into beaten egg diluted with a tablespoonful of water, then in sifted seed to be a serving dish and seed to skin and fat, wipe well with a damp cloth, then pound the meat well with crumbs from the center of a thick slice of bread. Try out a piece of fat salt pork in a frying pan until the bottom of the utensil is well covered. Lay in the meat and fry quickly until brown on one side, then brown 11/2 cupfuls of brown stock made by pouring that amount of boiling water over 1 teaspoonful of Vegex or a bouillon cube. Add to this any egg left from dipping the meat, cover closely and simmer until the meat is tender and the stock almost boiled away. Remove meat from the pan with a pancake turner to keep the pieces most attractive in appearance.

French-Fried Potatoes Cut peeled raw potatoes into rather thick strips and leave them in cold water an hour or more. Dry them between towels and fry quickly to a golden brown in a kettle of deep hot fat. Drain well on unglazed paper and serve hot, liberally sprinkled with salt.

An unusually attractive way serve such potatoes is to cut the tubers into tiny strips about the rize of a match. Arrange a layer in a wire it and immerse the potatoes in the hot fat. When they are golden brown, remove them from the fat, loosen the top strainer and tap the nest of potato out of its mold.

Buttered Peas

Have ready a small can of peas that have been reheated in their liquor and drained. Sprinkle with 1/2 teaspoonful of salt and add a iece of butter the size of a hickory nut. When the butter is melted and

### Bedrooms Are Private Living Rooms

NCE upon a time, when furnace | Bedroom floor coverings are also cally all of the family life was carried on in the one room that was while the other flower with five ta-pering petals and a long stem is warm in winter. In the summer, Gone are the days when a few small of slightly lighter weight than those dentified with the borage. This little habit kept the family using it. Or rugs thrown here and there in the used in the living room and library. perhaps it was that this room had quently in literature, notably so in the best lamp, around which everythe Book of Hours of Ann of Brit- one gathered to read, study or sew

In those days by far the greater par of the money spent on household Caps like the one shown here were furnishings was devoted to this gath-

Today, with the advent of general heating and adequate light for every room, there is no longer the evening grouping around one light. The chilstudy in quiet, undisturbed by visitors or the conversation of the family. If the best chum of the daughter to that produced by simple lines of who was master builder of the Engevening, the two girls go to the evening, the two girls go to the daughter's own bedroom, where their gay young voices will not interrupt occupations of the other members of the family. Those who want to write letters or read in quiet privacy, seek their own rooms, are so furnished and arranged that vacy and comfort abound. Every Room a Living Room

All this means that every room in the house is acquiring more and more the aspect of a living room. The modern bedroom seems to pride itself on being charming, restful, and suited to the personality of the person who lives in it. Above all, modern bedrooms are increasingly becoming to their occupants. Their colors and styles reflect and enhance the beauty and tastes of those who work and rest there. The furnishing must be expressive. It is just as easy to have a becoming room as a becoming garment.

The use of day beds is on the increase, and for rooms that serve as living quarters during the day, boxes free from the floor which slide out and in on steel runners, fruits, nuts or flavoring added for are available for convenient storage. variety. The only thing about them If the ordinary bedstead is in use, that might be called a trick, comes If the ordinary bedstead is in use, that might be called a trick, comes the bedding is often covered with a in the baking. For all meringues, in type of spread quite new. This is of fact, in all egg cookery a slow cooksome heavy dark material that does ing is required. A temperature of not wrinkle if the bed serves as a 121 to 177 C. or 250 to 350 F. is right. seat or a lounge during the day. When done, kisses are dry and leave Often the same material that is used the pan readily. They will keep fresh upholster the chairs or for the and good for more than a week. hangings, also serves as the bedspread. Not infrequently enough pillows are used on such a bed to transform it into a lounging place-pil lows covered with dark fabrics that

### Slow-Motion Opera

one-hoss shay, that was built motion" opera. The fact is, of course, that when music and the drama start out in company each wants to gang its ain gait, and progress is slow because in three acts produced recently at the Gaiety Theater, was, alas, built in guilt in the drama start out in company each wants to gang its ain gait, and progress is slow because in the variance one is always lagging behind the other. As Debusy himself put it: "Music possuch an immobile way that it ran kind of movement implied by its Through two long acts the hands of a stage clock pointed to half-past 7, and although eventually in Act 3 the author did get us from inside "An Old Secluded Country Manor" to "Outside the Manor," there was no need to go in again to look at the time—it was still halfpast 7. The librettist had failed even to make that progress achieved by Miss Bright of the Einstein limerick. who set out one day in a relative way and came home the previous

The Scenario

As with so many operas, one could not help wondering if the composer had begun his score before reading through the libretto. Here, without its trimmings, is the scenario in a sentence: a girl wants to marry one young man because her mother bids her marry another, who very good-naturedly gets the author out of the impasse by finding a wife for himself. This plot, pre-paleolithic in origin, is given an 1830 setting. Great geniuses like Mozart and Wagner, by absorbing our musical attention, can often, if not for long, make us forget a stage on which nothing is happen ing. Poldini, a competent enough musical craftsman, has not this power. One turned from the stage to

the orchestra only to find there was very little doing there too.

Hungarian by birth, Poldini has written many operettas and ballets his "Swineherd and the Princess" was produced at Covent Garden-but in England he is known chiefly by some piano pieces of a light and popular character. He is one of those who have an endless fund of pleasant musical small-talk, which many often, no doubt, admirable of its kind. With all the respect due to those who are never at a loss in posers who go on talking with nothing to say organized a like conspiracy we should all wish to join it.

Passing Conventions But although as a comedy-opera pulsion. By the way, we should like here. Krasa, a young man, is a pupil to see somebody try to dance to this of Zemlinsky, brother-in-law of amusing, it was instructive. It conmusic (or march to that of Krasa). Schönberg. Anton you Webern is one

elephants and oxen in an Eastern shoulder British stuff. Its thematic pageant, while the tin-lizzies of material apparently is borrowed

ing out that the problem to be solved in fitting intelligible music to intelligible drama is one of the most complicated and delicate ever Opera Compos undertaken by man, and that the kind of public who frequent operas do not in the least care to have it solved, he goes on to say: "Operatic audiences have always had the lowest standard of taste of any section of human beings calling themselves

reader in the sixteenth century; with his compositions Galilei took one of the first and most important out finding a collection of people more impervious to artistic progress. Sir Hubert Parry once let himself go on this subject. After point-

## Opera Composer

By PAUL BECHERT TT IS an interesting fact that,

apart from one exception, we cannot think of a single composer who has combined in himself the capacity of a great symphonic or lyric writer with the gifts of a drahimself has been a reactionary. For matic or operatic composer. The one instance, about the end of the sixteenth century Vincenzo Galilei apart from him, we may search in father of Galileo Galilei) made, it vain through the pages of musical is said, the first attempt at compo-history to find one great song writer sition for one voice independent of or symphonic composer who will go counterpoint. He also wrote and down in history as a great operatic published a pamphlet in the form of composer. Beethoven fell a victim to once: a dialogue on the merits of ancient operatic ambition with "Fidelio"—a and modern music, which reached great piece of music but not a work the conclusion that modern music of the theater. And how many of is only fit for the uncultivated those who love the beautiful songs of masses, and therefore to be despised by the connoisseur. Galilei set to music, for a solo voice, a scene from Dante's "Inferno" and some of the "Lamentations" of Jeremiah. The lamentations of critics which many are lost and others were lamentations of critics. have been a feature of opera ever not even finished? It is significant since. And although at present opera that Gustav Mahler, himself a man is hopelessly behind the times, one of the stage, a great operatic conducmust apologize for leaving the tor and manager of a fine opera house, should not even have attempted the composition of an opera. Essentially meditative, he shrank Franz from a form of art which demands a at the quite different talent-and one of a far cruder kind.

Warnings Unheeded With the examples of Beethoven those among his friends who warned him against it. But had he not in each of his many songs written a small drama? Why should the larger dramatic form be less suitable to his talents? Wolf, in his enthusiasm, completely overlooked the plain fact that the Lied, however dramatic, is still in a degree descriptive, reflective and retrospective, from its very nature. The stage, however, and a musical work intended for dramatic purposes, demanded more -or less. Less subtlety, less inward ness, and more of that theatrical quality which the French describe with the short phrase "C'est du

théâtre." Wolf's Ambition To compose a comic opera was the great ambition of Wolf's life, and onlight feasts and jingling ars" were the visions that Nevertheless, Krasa's music had an kindled his dramatic dream: the atmosphere of his "Spanish Song effect. It prepared us for that of Book," that collection of wonderfully lyric miniatures. When, in 1895, he seized upon a book by Rosa Mayreder entitled "Der Corregidor" mere shadows of sounds, as fuga-cious as vapor. Yet one sensed, while unable to discern, relation, pattern. What sort of music, pray, is this? The only thing in our musi-Corregidor" at the door of the libretto. It is cumbersome, its figures by Korngold, will be presented. shadowy and the action incoherent and undramatic, But Wolf's unhappy

of the stage was lacking in him. shall be able to follow the path of Schönberg and his associates. disappointments. Justice compels the statement that the reasons for All these items were received po-litely by the Friday audience, which by now expects the worst of Mr. Koussevitzky. Indeed, the Walton, which closed the first part of the degree due to the coteries of the Hanslick era which suffered no program, caused enough applause to bring the conductor back for one heroes beside Brahms and had nothing but castigations in store for a "Wagnerian" like Wolf. "Der Corregidor" itself, too. suffers chiefly, if bow, which without more ado he shared with the men.

Quite different was the spontanenot solely, from this orientation.

ous applause that greeted the symphony. And little wonder, for its In Wagnerian Idiom reading was electric. There will doubtless be those who will quarrel What had become of Wolf's dream of "moonlight feasts and jingling guitars?" What was to be a lightwith the conductor for his sharp con-trasts, the startling suddenness of Fate's knocking, the emotionalism of the Andante, the violence of the double-basses' attack of their footed, swiftly gliding, graceful comic opera was clothed in the idiom

technique. Even the principal theme, that of the Corregidor, is a literal quotation from "Meister-By ADOLF WEISSMANN

Berlin, Nov. 1

TOTHING is more interesting than to observe a composer of the first rank conducting the works of another composer of the first rank, especially when one is, so to speak, the father of the art of literal quotation from "Meister-singer," but slightly altered by a minor second interval. What had served well for the broad, pathetic events of a Wagnerian music drama, was ill in place in an opera calling for a light hand and wit—for an to speak, the father of the art of the other. This was the case when, at Isolde" and "Lohengrin." Having resigned his post as director of the Vlenna State Opera, Richard Strauss is now in the very pleasant position of being the most illustrious ornament of his art to be found in Eu rope, nay, in the world. For though composers like Stravinsky or Prokofieff may have attained great notoriety, they can never act as representatives of the art at the conductor's desk as Richard Strauss has done throughout his whole career Thus he has been engaged by the opera houses of Berlin, Vienna, and Dresden to conduct some of his own operas and those of Richard Wagner Richard Strauss is often said to be bored by conducting. He may, insion of being a tired business man mostly when he conducts his own works. He has now left his starting point so far behind that, naturally, he finds some difficulty in recoverthe impression is very different when he performs one of those works for which he feels a certain affection. When Strauss conducted his "Rosenkavaller" at the State Opera it was a great event, and he was in such good humor that sev-

eral times he could not help laugh-ing at what the Ochs von Lerchenau. A Calm Exterior It takes some time for Richard Strauss to warm up as a conductor, but when he reaches the climar of of often pleasing national a performance he surpasses most conductors in fire and enthusiasm. It

opera and to give dramatic interest, is true that the external appearance even when the orchestra is as full of of the conductor seldom betrays what color and the roles as grateful as in is going on within. But though he by by a seem very calm, he penetrates to the meaning of the work to which he devotes his efforts, with a deep insight. There are many estatic conductors who prove, by the abundance of their movements and gestures, much more stimulating than Richard Strauss. Nor can it be denied that these conductors allow dynamic power to permeate the score. This, however, is usually done at the cost of the style of the work. To Richard Strauss, who is a composer himself, the will of the composer is sacred. He never changes the character of a Wagnerian music drama by an interpretation which may do much credit to the emotional capacities of the conductor, but which is opposed to that at which the composer has

aimed. passages are rendered with a certain reserve. The love scene of the sec-

## Opera Houses in Russia

By VICTOR BELAIEV THE number of regular opera management. The organization of companies is constantly increasing in Russia. There are now two state opera houses in Moscow, the Big and the Experimental season in the Ukrainian opera houses Theaters, besides two secondary will continue for 7½ months; and opera conderns. One must also reckon during this time each company will such original operetta theaters as divide its time equally among the the Musical Studios of V. Nemirovich-Danchenko and K. Stanislavski. In

The most advanced of the Russian opera companies, the Marinsky and Mikhailovsky Theaters, besides the regular opera at the People's House. Outside these two capital cities there are operas in Kharkov, Kiev, Odessa, Baku, Tiflis, Ekaterinburg and other smaller towns. The capitals of the recently organized republics, included in the Soviet Union, are not only interested in having their own operas, but encourage attempts to set up national opera style. Such attempts are sufficiently numerous. We may mention here the opera of Alexander are operas in Kharkov, Kiev, Odessa, Baku, Tiflis, Ekaterinburg and other

sufficiently numerous. We may mention here the opera of Alexander
Spendiarov, "Almast," in which Armenian popular melodies illustrate
an Armenian theme, and the opera of
Reingold Glière, "Shach Senem,"

### The Author of "Frithiof's Saga": A Revaluation

takes one hundred years for an autobiography: author to win literary immortality then the Swedish nation may rightfully claim such a distinction for its son, Esaias Tegnér, whose "Frithiof's Saga" long ago became a classic. It was not for nothing that both Goethe and Sainte-Beuve expressed their admiration of the pro-fessor-bishop whose philosophic re-flections took a lyrical-rhetorical form, and who saw in the Christian religion a means of spiritual culture not common in his day. As for the appearance of "Frithiof's Saga," exactly a century ago, a revaluation of the sake of it is willing to hear with mean activation of the sake of it is this masterpiece and its author may not be out of place today. Tegnér's titanic individualism, his

F THE saying holds good that it impressiveness he says further in his Not a

"There is always a viking vein at Gothic race is not yet extinguished. A cold, but fresh and clear winter's day, which invigorates all human faculties and steels them for victorious battle against a harsh ture, is the natural image of the Northern temperament. Where this It was clear sky is present, where this fresh wind blows, the nation recogwilling to bear with many poetic shortcomings."
Coming from peasant stock, his

viking mood, as it were, bears no small resemblance to what characterized that of Byron. He was a rebel was combined in Esaias Tegnér that as far as political inclinations were stanch confidence which later concerned, but only in his earlier blended with his ecclesiastic task. years. As the distinguished professor of literature at Lund University, when Russia's attack on Finland inspired his "War Song." In 1811 his patriotic poem "Svea" won him the grand prize of the Swedish Academy. He was only thirty years old when he was appointed professor of

As one looks deeper into the production of Esaias Tegnér and notes a Viewing Esalas Tegner in the light of the author now and then, there of the present we are at once struck occurs to thought the picture of by the interplay of opposing forces in him that kept him fresh and elastic. In fact, the typical Värmland traits in Tegnér we find reproduced in that more modern classic, Gösta Berling. The Swedish nation, as it were, possesses just this resilience and response to what is demanded Berling. The Swedish nation, as it were, possesses just this resilience and response to what is demanded of it, and both the prose and verse of Tegnér reflect a masterful control of medium for the purpose of literary expression.

In the short autobiography which Tegnér wrote in 1839 he spoke of the Swedish national character in the relation to poetic expression. As a brilliance and distinction that charmed and fascinated all with

It is, then, with no small justifi-cation that the Swedish people of toclear, transparent. He is also willing to accept the profound—indeed, their national poet without a peer. clear, transparent. He is also willing to accept the profound—indeed, he values it. But it must be a transparent depth; he wants to see the golden sand beneath the wave.
What is vaguely said is vaguely thought is his theory. In this respect he differs from the German whose contemplative nature not only tolerates but even prefers the mystic and nebulous, in which he imagines profundities hidden. When it comes to the poet's apirit and theory of life, we especially like what is vital, fresh, impetitous, bold and audacious."

Those who have read and sought to discover for themselves the beauty in "Frithdof's Saga" need not be told with what mastery Tegnér here car-

Bloom and Fruitage in the Kitchen Garden

Written for The Christian Science Monitor

A garden I knew as a child was no "pleasaunce" or place For mere beauty to grow: blossom it boasted but fruit-bloom in spring, and the face (Yellow, rich, hanging low)

squash-flower awhile—but what need of a beauty-show there When fruit grew instead? apples—their senith July—balls of juice, sweet and rare,

Just above a boy's head seized the bent bough, climbed a little, and perched in a fork To sit at his ease, the ripest and finest—a connoisseur he at the work— Or discard, should he please.

It was wasteful, but apples were many. The dropped, cozing things
On the path made a feast
For the bees, or with cider-sharp smell brought a flight of soft wings,

Dear, tangled old place, spicy-hot in the summer noon's blur,

Of those busy white butterflies every green cabbage-row holds;
While the exquisite blue
Papillo blends with his sables and silvers and golds,
To the banquet came, too,

(A fairy king gorging as earth-folk might do, to his shame!) Then, as summer swing on,
The peppers burned red in their thicket, a jungle aflame.
The greenness was gone

From cornsilk and tassel. Harsh whispers where murmurs had been Said the corn-leaves were dry,
And a soft sigh was breathed from the ground where the vines straggled lean
That had climbed fresh and high.

Yet poets praise gardens of flowers, and neglect those which bear Fruited bough, bed and vine;
They then had no kingdom like ours, and no wanderings there Like my playmates' and mine:

Dew-wet at day's close, Were you Eden the less that your scent was of apples and myrrh And not of the rose?

JEANNIE PENDLETON HALL

mous picture of "The Haywain" realism. The lapse of time has brought us many of his preliminary and practice sketches as fascinating evidence of his method and tireless devotion. Many of these are studies of the cathedral which he painted on two other occasions and which as a result is the best known of the Eng-

ple landscape. William Blake once exclaimed while looking at a drawing of fir trees on Hampstead Heath, "Why, this is not drawing, but inspiration. To which Constable quietly re-

accept no test of color except A cozier time no boy could have nature's own brushwork, this pichad. Just the two were there, and ture of Salisbury is an epitome not the smiling face that looked out over only of his own achievement but of the plates and caps gave me courage

So many in number, between the ships and the streams of Xanthus, shone forth in front of Troy the fires kindled by the Trojans. There were kindled a thousand fires in the plain; and by each one there sat fifty men in the light of the blazing fire. And the horses, munching white barley and rye, and standing by the charlots, waited for the bright-throned Morning.—Iliad VIII. 560.

### Forest Values

At the gates of the forest, the surprised man of the world is forced to leave his city estimates of great and small, wise and foolish. The knap-sack of custom falls of his back with the first step he makes into these precincts . . . Here we find nature to be the circumstance which dwarfs every other circumstance, and judges like a god all men that come to her.
We have crept out of our close and crowded houses into the night and morning, and we see what majestic beauties daily wrap us in their bosom.—Emerson,

"Emerson, the last leaf. I think these are among my best."
"What is the history of "The Chamberd Nautilus'?"I asked.

"It has none," came the reply, "it wrote itself." — Edward W. Bok, in "America Give Me & Chance!"

#### Breakfast With Holmes

may be imagined.

Within the hour the messenger brought back this answer: My dear Boy: I shall certainly look for you to-

morrow morning at eight o'clock to have a piece of pie with me. That New England, you know. Very cordially yours. Oliver Wendell Holmes.

Strictly speaking, I was there at seven-thirty, and found the author already at his desk in that room overlooking the Charles River.

"Well," was the cheery greeting, "you couldn't wait until eight for "I meant it for drawing." In his your breakfast, could you? Neither eyes the only genius he possessed was lifelong absorption in the comhave my breakfast at seven." And was lifelong absorption in the common scenes about him.

"I love every stile and stump and lane in the village," he once wrote;
. . . I shall never cease to paint them."

have my breakfast at seven." And then telling me all about his boy-hood, the cheery poet led me to the dining-room, and for the first time if breakfasted away from home and them." Because he loved much and would crat" at his own breakfast-table!

### Breaking Through Custom

The super-excellent, the rare, the best of anything is nearly always in some sort contrary to custom. But the giants should break the custom and that is why I believe that a conservatism like that of England has been of very great value to literature in the past. The opposition which it offered to change was so great that only the most extraordinary men could bear to break through. something superior to classical work by attempting romantic work, he is of sugar and other dainties, was put to do better than has already been done means to add something of great value to the sum of human exdone means to add something of great value to the sum of human ex-

pense with any discipline which im-

pedes its activity; it can be ex-cused for the breaking of rules, be-

cause it has something better to give in return for what it breaks. But every man is not a genius, half a dozen men out of a million perhaps represent the likely proportion. So that a great multitude of writers without genius, even without marked ability of any kind, may do much mischief by following the example of a genius in breaking rules, without being able to atone for this temerity by producing anything of a respect-able order. The fact is that thou-sands of young men in Europe want to be romanticists, merely romanticism represents for them the direction of least resistance. Even to do anything according to classic rules requires considerable literary "The Chambered Nautilus' is my most training and patience. And these mer finished piece of work, and I sup-forget that the great romanticists forget that the great romanticists minshed piece of work, and I suppose it is my favorite. But there are also 'The Voiceless,' 'My Aviary,' written at this window, 'The Battle of Bunker Hill,' and 'Dorothy Q,' written to the portrait of my great-grandmother which you see on the wall there. All these I have a liking for, and when I speak of the poems that the great romanticists have mostly been men who, although breakers of rules, could make new rules of their own. I mean that in Europe, at present, both in France and in England, the romantic tend-ency is to throw all rules aside without reason, and without good result. . . On the other hand, a for, and when I speak of the poems result. . On the other hand, a romantic reaction is the only possiought to be included, "The Silent Melody" and "The Last Leaf." I think discipline has brought about a An hour later Corby flew back into my room, where he was received with cries of "You are a naughty bird, a thief," and so on, by the indignant maid. Corby looked at her, opened his beak and put down the ring upon the table. He had only taken it away to play with and show to his friends.—Erra Close, in "Excursions and Some Adventures." utterance or emotion—as happened in the middle of the eighteenth century.—Larcappo Hrann, in "Romantic and Classic Literature in Relation to

no degree determine man's condition.

have no dangerous inheritances, and

"Heredity is a prolific subject for

Bellief ir the hereditary nature of many types of disease, even according to the medical profession, has undergone a radical change in the last quarter century. The belief that certain diseases which were formerly declared to be hereditary, perpetuated perhaps in several successive generations, were incurable has been found to be wholly blessed; and she also makes to be sets burden of materiality is nothing more than false belief, the ill effects of which may be removed through right understanding. Thus the problem becomes wholly a mental one bests burden of materiality is nothing more than false belief, the ill effects of which may be removed through right understanding. Thus the problem becomes wholly a mental of wholly blessed; and she also makes the problem of the property of the problem of erroneous. For example, it is now ous and inharmonious conditions. But asserted by medical authorities that even tuberculosis, so called, is not hereditary. Such a declaration was means whereby the ills and woes of recently made in an address to a mankind are healed, that is, de-body of medical men in a city of New stroyed. The way is not difficult, and

Little by little, it seems, the world is awakening to the fact that man-kind, in so far as it appears to be a law that the word comes with a great victim to evil, is so only because of surprise that escape from this age-its erroneous beliefs. The truth of long belief is possible, that relief is the ancient proverb, "As he thinketh at hand. When it is learned that in his heart, so is he," is found to be man's origin is not in matter but in far-reaching. If one thinks health in God, who is Spirit; that man was terms of spiritual understanding, never conceived in sin, nor brought health is manifested; on the other forth in iniquity; that man was never hand, sick thoughts produce sick forn into matter, but remains forever bodies. Hence the mental phase of the perfect child of God, the strength disease is being taken more fully of the belief of heredity is broken. into consideration. "If you think that Man as the offspring of God, who is consumption is hereditary in your infinite Spirit and all good, never infamily, you are liable to the develop- herited qualities unlike God, Spirit. ment of that thought in the form of Man is spiritual and perfect, possesswhat is termed pulmonary disease, ing no material qualities or attriunless Science shows you otherwise." Thus Mrs. Eddy writes in the textbook of Christian Science, "Science and Health with Key to the Scriptures" (p. 392); and she closes the lows that mankind has labored under paragraph with these significant a self-imposed burden of false beliefs, words: "Your decisions will master from which escape is now possible you, whichever direction they take." and altogether practical. When it is How important, then, becomes the fully understood that God is Life, question of one's thinking! As one's and that into man as the expression decision masters him, how important of Life there can enter no evil or that the decision be right, that is, fleshly belief, then all fear of an evil founded upon permanent truth!

Christian Science has done much to awaken humanity to the realization that successive generations are not necessarily victims of family beliefs and traits of character; that heredity has no foundation in Truth, is not a law of God. It not only makes very clear the importance of right thinking, but it also opens the way whereby all who will may gain the spiritual fleshly ills will disappear." How understanding which not only de- blessed will be mankind when it stroys the false concepts of life and enters upon the happy estate of freehealth, but becomes one's safeguard dom from all' belief in constricting against the beliefs of heredity and evil! It is a present possibility for contagion. those who will walk in the way of Mrs. Eddy revealed man's true in- God's appointing.

# ANTIQUES for the HOME MAKER and the COLLEC'

### American Windsors---Good, Better and Best

By CARL GREENLEAF BEEDE

HE wide range of designs in which they are found, the large number which have been available until recently, the marked individuality which makers show, are some of the reasons for the strong appeal which Windsor chairs make to everyone who is fond of old-time furnishings. There has been much speculation and diversity of opinion concerning the origin of this type of chair construction. We are not concerned with that topic here. It is rather our purpose to briefly outline the characteristics which distinguish those more commonly found, to call attention to the comparative merits of a few examples, and to suggest how and why their manufacture gradually declined and the style was supplanted by much less substantial and attractive styles.

Considering the wide interest in

Windsor chairs and the high value which is now placed on them, it is to be wondered that the literature on this subject is so scanty and so difficult of access. The painstaking and thorough research of Dr. Irving Whitall Lyon appearing in his volume entitled "The Colonial Furniture of New England," supplies our main source of historical data, and is accompanied by half a dozen illustrations. A valuable contribution to our knowledge of designs was made by Wallace Nutting, who pub-lished his "Windsor Handbook" in 1917. These two references, with that of J. B. Kerfoot, the result of whose studies appeared in a richly illustrated article in Country Life of October, 1917, include practically all the serious considerations on the Much worth-while information may be gathered from these three authorities, although harmony of opinion is not found at every point.

Of Purely American Character One of the things that interest us most about Windsors is the fact that we see them in variety and charm that are distinct expressions of American taste and skill such as are found under no other class of home fittings, with the possible exception of home-made rugs. Although the Windsor chair originated in England and the first of which there seems to he any knowledge in America were probably brought from that country, comparison of the English chair shown in Fig. 1 with any of the others on this page clearly shows that early American makers took from the English little more than a hint. From this they worked with freedom, originality, versatility and with a refinement of skill in both design and execution which, taken all together, hav made American Windsor chairs an outstanding product of the late eighteenth century

worker in wood. To outline briefly the result of Dr. Lyon's investigation, he finds Wind-sors were first mentioned in American records in Philadelphian inventories of 1736. They were probably of English make, for the first advertisement of American-made chairs was found in & Philadelphia news-New York maker advertised them, but not until 1769 does evidence appear that they were made in Boston. Hartford, New Haven and Providence records follow in the years 1786 and 1787. The values of those days are learned from Boston inventories of 1769 and 1773, which show that the prices were from 3s. then paid a daily wage of 1s. or 2s., but since there is no final authority the relative cost isn't so much more now than it was then, based on what a day's pay would buy.

Philadelphia pioneers in this line followed English models with some modification, as two of their earlier output here illustrated by Figs. 2 New England practice, starting a dozen years later, acquired these states that nearly all those shown on this page came.

The commonest form of Windsor

is that which is shown in Fig. 4 called by some the "loop-back," and by others the "hoop-back." The construction is substantial and inexpensive, and is subject to a wide range of modification. This one is graceful though simple, the legs and bow being of lighter weight than is sometimes found. This applies also to the seat. It should be noted here that the most important portion of a merit is the bulk and form of the leg turning. Comparing the legs of this piece with those of Fig. 5, the difforence is quickly seen; 4 is about as simple as a round leg could be made without being a cylinder, while has the vase-and-ring pattern that is seen on so many of New England

Desirable Loop-Back

Still more desirable is the loop-back in figure 6 with equally good legs and back-braces in addition. Even higher in merit is 7 which has well turned legs, braced back and shapely arms. This is remarkable for its slender spindles which are turned just above where they enter the peat, a peculiarity that has been to be still be similar to be writes:

"Could you give any reference to us concerning where we could find out what period furniture is worth? We realize that it is a hard thing to do but thought that you might know some book or magazine that would give us a bit of information."

This is one of the hardest questions you could ask us. So much depends on what might seem trifling details of design that the subject is indeed very complicated, and is to be of design that the subject is indeed very complicated, and is to be learned only after years of study. We are trying to give what aid we can by printing public sale prices, with as much explanation of the articles sold as seems desirable.

Some advertisers in publications devoted to antiques illustrate and price their goods, a practice which allows another source for you to seek. weat, a peculiarity that has been noted in 30 or more which the writer has seen in four New England states in 10 years. About half of these were arm chairs like the one shown, the others precisely the same except for the absence of arms. Of the number mentioned, six were in one group just as they had come from the home-where they had been for several gen-

Worthy of notice here are the leg turnings, which are of unusually fine orm, the same outline in different proportions appearing also on the arm posts and the spindles. Three fan-back chairs appear in

figures 8, 9 and 10, their value being low, medium and high in the order named. In these the difference is not only in the legs but in the seats and the backs, the legs on 8 being similar to those in 4, while 9 and 10 are about equally good. Figure 3 has a much better back than 8 for the

top rail of 10, although this is a small matter when one finds the rare. scroll carved ears which are quite the finest thing about the number 10. These ears greatly increase the charm of this fan back, and when combined with its general design of back, seat and legs it is so harmonious throughout as to make it most desirable of its kind. It cou'd hardly be a better fan back, unless it had a pair of braces. In that case, it would be exceedingly rare, for such com-bined details are exceptional indeed.

posts are well turned to match the seat is excellent with its suggestion legs, and its seven spindles are more of saddle form, with its pummel. The slender than the six in 8. The back spindles of the back not only carry a heavy swell between the seat and of 9 is also superior to 8 because the top rail curves more deeply. In this respect it has an advantage over the backward, although this does not appear in the cut. From what has already been said, it will be well un-derstood that "Windsor" may mean much or little as indicating certain chair is worth while. We lesire strongly to emphasize the need for close attention to furniture debut to all others under the head of

bow backs, and having a slight iccurve to the bow just above the seat; bamboo leg turnings, and spindles corresponding with the legs. These minor features have been found so consistently in chairs with this stretcher as to lead us to conclude that the same man made them all. the expense of the comeliness. This

from 1603 to 1625. The question raised was why the Jacobean times of King James should give the name to the style which prevailed in the times of his predecessor. This apparent inconsistency is explained by the fact that those furniture forms which were most conspicuously characteristic of a period were in general the ones which carried its name. Very few examples of Queen Elizabeth's time have come down to us from the late sixteenth century in which she lived. In fact there was very little used then except in the homes of great wealth, armchairs, chests, court cupboards, and tables with heavy bulbous legs being the main items, aside from stools and forms on which most people sat. During the latter part of her reign heavy turned chairs of the were in general the ones which carple sat. During the latter part of her reign heavy turned chairs of the Carver and Governor Brewster type appeared, also tables with lighter frames. These did not get into general use until after 1800, in the times of King James, so although the form did not originate in his day it did be-

### BOOK REVIEWS AND LITERARY NEWS

### The Senate—Defender of Demos

A Review by W. Y. Elliott, Harvard University

ally I may seem to have the qualifications that Byron said Mitford possessed for writing history: 'Complete partiality and a bad Considering my purpose thod, this may be an adand method, this may be an auvantage." Professor Rogers thus announces himself in a preface which, like the rest of this admirable book, is distinguished by its vigor and its

Nor are apologies of any sort necessary, unless it be a vice to shun that dreary academic attitude that succeeds in being completely gs of the American Government in its legislative branch, nor mentarism—as his other works bear Administration forces (normally in ample witness. The only traces of control of the Senate through its torian that actually appear in this and through the organization of its that in this rare book a scholar who all power to force the consideration is acquainted with all the relevant of executive acts. It could be facts, who has subjected these facts "managed" with the same smooth to a discerning analysis, after his disregard for any questions that examination of the facts, does not might embarrass the Administration hesitate to announce his convictions and his reasons for holding them. There is more real political insight in "The American Senate" than in any similar description of the Government at Washington now in print. It is not designed to be a text; its scope is limited, yet it throws a flood of revealing light upon just those administration of the Department of features of the interrelations of fed-Justice, the Veterans' Bureau, the eral institutions that the textbooks have left perforce in ambiguous ob-Novel Grounds

The conclusions which Professor Rogers has reached are tersely put in his own words: "The undemooratic, usurping Senate is the indispensable check and balance in the American system, and only complete freedom of debate permits it to play this role. Its owner comes in the research this rôle. Its power comes, in large part, from the guillotine to which the House of Representatives submits—a procedure which has attracted scant attention—and is more indispensable because it is directed against government by favorable publicity through the medium of the White House 'Spokesman.' Adopt closure in the Sensite and the character of the Senate, and the character of the sion, American Government will be pro-

foundly changed."
This defense of the Senate's claims in the Senate's "Cave of the Winds" not only a necessary refuge for the proposal commands the support of almost every student of American harried rights of free public discussion by a genuinely deliberative body, but a hall of champions against presidential propaganda. The case for unlimited Senate debate based upon the power that this right gives to a determined minority to force an investigation of the Executive, the adorned the tale. The Senate is not investigation of the Executive, the senate as a check upon But the use of the Senate to offset the powerful propaganda which modern press methods have placed in the hands of the President through the daily remarks issued by his alter ego, the White House "Spokesman,"

is a view of its power that is at once new and extremely important. Can Make Themselves Felt

### A Fine Jewel, Little Worn

Crewe Train, by Rose Macaulay. London: Collins. 3s, 6d. net. New York: have, I expect?"

Oh Mr. Porter, whatever shall I do? I meant to go to Birmingham and they've sent me on to Crewe.

dressed, well-housed, socially acnobody seemed to notice the lack, them, writing books and giving par-

about. And the one thing that Denham did not want to do, thought it quite unnecessary to do, was to talk. If Birmingham stood for saying just what you had to say and no more, never talking about yourself, or other people, doing the things you wanted to do alone and not collecpeople when you could, instead of always trying to gather them together, or go where they were gathered together, for the mere sake of talking to them, then Birmingham was certainly where Denham belonged.

A Refuge From Talk

At Andorra, where Mr. Dobie, swung her away into that swiftly Denham, with her uncouthness, her

nothing else you wanted to say, I quent sentences devoted to his oper-suppose?" suppose?"
"'No, that's all right, thanks very

much. "Denham returned to her roo rather pleased with herself. She had talked for quite a time. And it had not been really difficult either. She was certainly coming on.

An Escape From Callers

After she had married Arnold Capel, who moved smoothly and contentedly in the superficial intellecbeing so busy doing things, and tualism of the Gresham circle, Den-Arnold and would have liked to have him with her all the time, had befairs, all of which had to be talked fore long had quite enough of Crewe —now in Tavistock Square—and tried desperately hard to get back to Birmingham. But Arnold, with his sociability, his pleasant manner, his novel-writing and his love of talk—above all his love of talk—belonged essentially to Crewe. Birmingham, in the shape of a lonely Cornwall cottage with an underground passagedropped into by lifting a loose plank in the sitting room floor-whi to a cave by the shore, appealed irresistibly to Denham. If you heard callers coming (callers who came for one purpose only, and that was to talk—and it was impossible to avoid callers anywhere if you belonged to Crewe) you could drop into the underground passage and escape leaving no trace whatever. All of this gives Miss Macaulay the opportunity for much clever writing, and shows her to possess a fine, discriminating sense in dealing with those smaller tragedies of human experience which on the surface do not pass for In the end, Denham having broken

away from Crewe for a time, and come back again, settles down to what seems like compromise, a house in Buckinghamshire, where presumably there is to be more of Birming. ham than there was in Chelsea or in Tavistock Square. But Miss Macaulay leaves us in no doubt up to the las page that Denham is still in the wrong train. For "Metroland," far more even than the Eastern Pyrenees, is at the mercy of people whose one object it is to talk, and "Metroland" is at the mercy of telephones too. "Telephones. The sort of thing people would invent, so that even being in different houses shouldn't stop them talking to each

other." The score of Ralph Vaughan Wilsode founded on Bunyan's "Pilgrim's Progress," has been published by the "'I don't know.' Miss Garden's Oxford University Press, American yawn broke into a laugh. 'I've never branch

### Taking Off the Patina

George Washington, the Image and the Man, by W. S. Woodward. New York: Boni & Liveright. 34.

eorge Washington, the Human Being and the Hero, 1722-1762, by Rupert Hughes. New York: William Morrow & Co. 34.

stance he seems to have been. How very much the restricted, fox-hunting little farmer.

one had almost said shows him up—very clearly. Solemn, persevering, courageous; cold and impersonal, domineering and critical, proud and flery tempered, pompous and humor-less, haughty and vain; a great executive, a great business man, a great materialist, possessed of little education, of no imagination and of a passion for land, for "things," for numerical accumulations. And in his earlier days "a long and awkward young large, and who has a passionate ad-

The book is at all times interest-ing, colorful, easily read; written in swift, pungent sentences; a little too the retreat has been immensly exagmuch so, sometimes, a little cheap, occasionally, a little too epigrammatical, since the pace set by "the kind of man who early in life begins to look like a family portrait," for linstance, cannot perpetually be maintained. And on the other hand illuminated by the rich glow of such phrases as that in which the author says of work in colonial days that "it had to do with the soil, with heavy logs, with ships and fish," by the felicitous poetry of such passages as that describing how Hamilton's "ideas fell on the slow moving mind of Washington as sunlight falls on houses in Spain."

tions of the book are those dealing with the causes and beginnings of the Revolution, and with the popular war itself. The "patriots," the mutineers—these are absorbing. Although one could wish fir a little restraint, a little less of what one instinctively, and perhaps wrongly suspects to be exaggeration a little less of the evident anti-British, antiaristocratic bias. In discussing the British share in these events it was

not necessary, surely, to write sentences gratuitously offensive to English readers; and the one-sided sociology of the picture is not at all times convincing. That Washington was an aristocrat is, after all, the!

a trifle hasty in his conclusions. The now professor of apiculture at Corbrief dismissal of Genet as "some ations do not reveal any very com plete appreciation of his official career; while the characterization of John Jay as an aristocrat and anglomaniac, a "third rate statesman . . completely blinded by the glitter of the British aristocracy," is simply an echo of the fanatic, Jeffersonian, Jacobin, American street rabbles of

"The Splendid Boy"

1795.

Washington's life-walks on all the complain of in this first volume an even more glorious manhood. Even when Mr. Hughes would seem to be proving that Washington was an extremely petulant, brash young man, sometimes incompetent, critical of his superiors, touchy about his rank, occasionally brutal in his actions and not always so careful of his military honor, Mr. Hughes almost always finds the extenuating word, the justifying phrase, the admiring sentence. Washington must do no wrong, and so, for instancein the case of the alleged military homicide of Jumonville-the single French eyewitness who escaped "told a story that was doubtless false in many particulars, not only because it contradicted Washington's story, but because it contradicted his SAILING SHIPS

and their story. A book about old and new ships. Beautifully designed — 140 illustrations—380 pages. For boys from 8 to 30. \$4.60 postpaid. Free catalog of things that smack of the sea. SEA ARTS GUILD 105-J Eleventh Ave., Milwaukee, Wis.

For over thirty-five years the Hammond Publishing Company has made an intensive study of the needs of Sunday Schools. The latest catalog contains a wealth of material and will be welcomed by Sunday School workers everywhere. It contains everything in the way of records, books, Bibles and Testaments.

We shall be pleased to send a copy of this catalog, free and postpaid, to anyone requesting it. A postal card will do.

Penn Water Power Company declared the regular quarterly 2 per cent dividend, payable Jan. 3 to stock of record Dec. 17.

National Power & Light declared the

payable Jan. 3 to stock of record Dec.

National Power & Light declared the regular quarterly dividend of \$1.75, payable Jan. 3 to stock of record Dec. 11.

Standard Gas & Electric Company declared the regular quarterly \$1 preferred dividend, payable Dec. 15 to stock of record Nov. 20.

Hudson Motor declared the regular quarterly \$7%c dividend, payable Jan. 3 to stock of record Dec. 15.

MINNESOTA BUTTER INDUSTRY

ST. PAUL. Minn.. Nov. 20 (2)—Nearly

ST. PAUL, Minn., Nov. 20 (2)—Nearly doubling its butter production during the five-year period ending in 1925, the Minnesota dairy industry last year received approximately \$174,000,000 from sales of its products.

COPPER BUYING QUIET NEW YORK, Nov. 20—Copper buying is quiet here and abroad. Prices remain unchanged, with metal for domestic shipment 13% cents a pound delivered to the end of February. European destinations are at levels corresponding with 14% cents c. l. f. Hamburg, 14.27% Havre and 14.32% London.

CEMENT PLANT PROFITABLE PIERRE, S. D., Nov. 20 (27)—The state cement plant at Rapid City is expected to turn nearly \$100,000, or the amount of interest on cement bonds, into the state treasury as a result of this year's operation, Governor Carl Gunderson said.

Surplus and undivided profits of the Guaranty Trust Company of New York on Nov. 15 amounted to \$25,202,569, a gain of \$595,783 in undivided profits since Sept. 30. Total resources were \$638,897,032, with deposits of \$511,107,403.

AN ALUMINUM STREET CAR CLEVELAND, Nov. 20 — Construction of an aluminum street car is nearing completion in Cleveland Railway Company's shops. Aluminum has been substituted for steel wherever possible. Cost will be approximately \$18,000, compared with usual car cost of \$12,000.

NEW GUARDIAN TRUST DIRECTOR Albert M. Greenfield, president of the Philadelphia real estate company bearing his name and president of the Bankers' Bond & Mortgage Company, has been elected a director of the Guardian Trust Company of New Jersey.

### STOCK TREND DURING WEEK IS UNCERTAIN

Drop in Motor Output and Lower Steel Activity Are Factors

NEW YORK, Nov. 20 (Special)—The ather pronounced irregularity of the stock market practically throughout the week was attributed in the bestinformed circles largely to uncertainty as to the probable trend of general business for the next few months, as well as that for the market for se-

As the week closed, this attitude still prevailed. While no one was inclined to doubt the favorable forecasts by Judge Gary of the United States Steel Corporation and many prominent railroad officials who were in New York this week for gatherings of several important railroad associations, that business would continue at a satisfactory level during the early part of next year and even for a longer time, there appeared, nevertheless, to be a lingering feeling in many minds that these forecasts would not be realized.

Drop in Bank Clearings

Drop in Bank Clearings

Considerable was made of the sharp decline last week in bank clearings, and it was contended that a similar shrinkage this week would not cause surprise. Carrying this line of argument still further it was maintained that such decreases as that of last week could not be continued very long without being reflected in the earnings of industrial corporations and the railroads as well. It was freely admitted, on the other hand, that business on the whole is holding up very well, and that 1926 is likely to close with a record degree of prosperity.

Investment holders of securities will

perity.

Investment holders of securities will do well to bear in mind that the earnings of a great number of the largest and strongest business enterprises promise to be so much in excess of dividend requirements for the current year that earnings could be considerably smaller next year without present rates of dividend being disturbed. Extras might be cut off, but on the basis of this year's results, there could be no question about regular disbursements being continued.

Dividends Well Protected

culators have been considerably sed with regard to both the steel Ty, and the probable trend of States Steel common stock in arket. So far as can be learned, mer is going along just now at recent levels.

apprehensive of a material shrink-in new business between now and end of the year, and of a still her decline after the turn of the Speculators in the common thad brought themselves to be-

further decline after the turn of the year. Speculators in the common stock had brought themselves to believe that an extra dividend of some kind might be declared on that issue at a speculation of the directors before Dec. 31. Naturally they were disappointed over the statement by Jisdge E. H. Gary a few days ago that such action had not been considered by the board.

The stock was freely sold during the rest of the week and declined nearly 10 points. It would seem natural to expect a continuance of this confused and uncertain attitude until something more definite is forthcoming relative to the outlook for the industry or the declaration of an extra dividend in some form.

Outlook for Motor Industry

As to the automotive industry, it is becoming increasingly evident that the strongest companies are likely to continue prosperous, while highly competitive conditions are likely to result in consolidations of some of the smaller manufacturers. It is doubted in the industry that any such consolidations will come about in the immediate future.

The money market moved in a natural way throughout the week, with the exception of somewhat higher rates and a more general calling of loans on Monday and Tuesday than had been looked for. The 4½ per cent quotation that prevailed from that time on is regarded as a normal rate at this season of the year.

The quotation for call loans is almost certain to be higher during the lose of this month, and may be still higher during the greater part of December, as the distribution of interest and dividends both on Dec. 15 and Jan. 1 undoubtedly will be the largest for those dates in the history of the country.

BUYS MAINE CEMENT COMPANY BUYS MAINE CEMENT COMPANY THOMASTON, Me., Nov. 20 (P)—The Lawrence Portland Cement Company of Pennsylvania announces the purchase of the New England Cement & Lime Company at Thomaston. The property represents an investment of \$1,500,000 to date and the announcement stated that the lime plant will be doubled in capacity immediately and a new cement plant will be built costing between \$2,000,000 and \$3,000,000.

COCA-COLA COMPANY MEETING

### WHEAT VALUES SHOW DECLINE

Estimates of Larger Crops in America and Australia a Factor-Exports Off

CHICAGO, Nov. 20 (Special)—New low prices for the crop were made for all wheat futures this week. Heavy liquidation on the favorable weather in Argentina, and prospects for larger crops in both this country and Australia, with rapidly increasing stocks in Canada and a limited export demand, all combined to discourage holders and to increase the bearish feeling in the trade.

While the peace proposals of the Government in regard to the coal strike in England were rejected by the miners, there is hope still that a settlement will be effected.

Bearish Statistics a Factor

Bearish Statistics a Factor

Bearish Statistics a Factor

Bearish statistics have been the principal factor in determining trade sentiments. World stocks increased 16,000,000 bushels for the week, and the world's supply now available is 59,000,000 bushels more than a year ago. Stocks afloat, United States visible, Canadian stocks, and bonded wheat supplies in this country all increased for the week.

Argentina and Australia are now cutting wheat, and the export movement is expected to start unusually early. This will tend to throw the Canadian wheat into unusual competition with the southern growers, and foreigners will be encouraged to economize, as they have been doing for some time.

mize, as they have been doing for some time.

Unless something radically wrong develops in Argentina or Australia, the immediate prospects are for limited foreign buying. Russia is shipping wheat freely compared with a year ago, and reports from that country indicate free collections in the interior and increasing port stocks. European stocks are light, and the nearby positions continue strong.

The unfavorable strike developments were not considered builtsh on this side. About the only effect is to delay shipments of Canadian wheat and increase the chances of keen competition in the winter and spring.

Shorts Keep Corn Up

Shorts Keep Corn Up The local milling demand is fair. Railroad estimates of the Canadian crop were bearish, the Canadian Pacific estimates the yield of the three provinces at 405,000,000 bushels, or 24,000,000 bushels more than the Government.

24,000,000 bushels more than the Government.

Corn was stronger in the face of lower wheat values, but the demand was principally from shorts. A great amount of short corn was covered on the rally, and the question appeared to be whether there had been much investment buying. A big falling off in receipts, with a better shipping demand coincided with the demand from shorts, and helped rally the market.

Stocks of old corn are enormous, and while a little export inquiry developed on the dips, Argentina continues to fill up the foreign markets, so there is no present prospect of any big business. A good many operators have covered short corn and sold wheat, this spread having worked well the last few days. With cold weather continuing, a fair run of new corn is expected to start shortly.

Oats trade has been without much feature. A little export buying of rye helped stiffen rye prices after a big break.

FALL RIVER CLOTH SALES ARE LIGHT, WITH PRICES FIRM

FALL RIVER, Mass., Nov. 20 (Special)—Buyers in the local cloth market this week continued to place only orders in small lots for immediate delivery to satisfy current needs. Sales ran no higher than 60,000 pieces and this figure is not expected to be bettered while the cotton market shows its present strength.

Inquiry has increased considerably since the middle of the week. Trading in sateens still dominates the market, with twills and narrow goods selling to some extent.

with twills and narrow goods selling to some extent.

Prices are holding firm, and are generally unchanged from last week. Brokers, however, express the opinion that the mills can be induced to shade prices an eighth of a cent in case sizable orders are received.

Sateen sales included the 37½-inch, 64x104, 4:37s, at from 11½ to 11% cents, and 38x44, 5:20s, nine-inch constructions of shadow stripes at 3 cents. Today's quotations on standard goods are: 38½-in., 64x60s, 7½c; 39-in., 56x 44s, 5½c; 27-in., 64x60s, 5c; 27-in., 56x 52s, 4½c; 25-in., 56x44s, 3¾c.

#### American Tourney Set for June Within Same Week as British Fixture

dation yesterday threw down the auntlet to the Royal and Ancient Golf Club of Great Britain in an interwhich now threatens the entire program of 1927 competition between the

The dates fall within the same week at least two veeks apart, although last year the governing body here reluct-antly accepted early July dates to make possible a British invasion by

At the same time the U. S. G. A. Secutives selected Mond., June 6, for district qualifying rounds of the open; the week of Aug. 22 for the amateur championship at the Minnikahda Club of Minneapolis; Aug. 2 to 6 for the public links championship at the Ridgewood Club of Cleveland, and awarded the women's championship to the Cherry Valley Club of Garden City, N. Y., leaving the date open. Action Follows Controversy

Discussing the action of the executive committee on the open champion-ship, Herbert N. Ramsay, secretary of the U. S. G. A., said that no new effort would be made to make the date of the British open changed. The action by the American officials comes

action by the American officials comes after a long controversy in which the moving forward of the British open to May or early June has been sought, owing to peculiar conditions prevailing in this country.

"After all, the American open should come first with us," said an Ramsay.

Referring to the conference of William C. Fownes Jr., preddest of the U. S. G. A., with British officials over open championship dates just sugmirer. Mr. Ramsay said the American executive had been given to understand that the Royal and Ancient Club would advance the date of its leading fixture.

"And then they proceeded last August to fix the date of their next open championship for the week of August to fix the date of their next open championship for the week of June 20," he said. "We already have referred our dates to the Professional Golfers' Association, and they have approved them. Perhaps British players will be just as well satisfied if they don't have to face another invasion, anyway," he concluded, An American entrant has been victorious in five of the last six British open tourners. June Conditions Ideal

The late June dates have been se-lected, golf officials pointed out, be-cause conditions are ideal at that time the open event in this country.
urses here are at the peak of condin, they claim, whereas in July the
ks become dry and hard, while the

links become dry and hard, while the contestants frequently are compelled to play under oppressive heat.

The conflict in dates not only offers an obstruction to contemplated participation in the American open by British professionals, but probably will prevent an international team match between professionals of the two countries which tentatively had been arranged to immediately precede the American open.

ATLANTA, Ga., Nov. 20 (49)—Robert
Jones Jr., American and British
pen golf champion, said last night
at unless his business interfered, he
could defend his American golf title

Von Elm of Los Angeles, last summer.

SCRUBS IN SCORELESS TIE,
NEW HAVEN, Ct., Nov. 20—The Yale
and Harvard University scrub elevens
attled to a scoreless tie here yesterday
a poorly played game in which many
ubstitutions were made. The Harvard
crubs showed the better game but were
nable to carry the ball across the Yale
ne, although they had it in scoring disance several times during the contest.
the Harvard rush line blocked taree Yale
icks, but could not take advantage of
hese breaks while the Yale defense
howed its only signs of strength when
a goal line was nestred. Poor passing
nd ineffective rushing featured the game
thich was very uninteresting to the few
pectators who watched it. SCRUBS IN SCORELESS TIE

B. A. A. GAMES FEB. & albert Geiger, chairman of the athletic amittee of the Boston Athletic Asso-ion, announces that its Thirty-eighth utal invitation Track Games and Re-Carnival will be held in the new Bos-Arena, Boston, on Saturday evening, § 1927. The thirty-second indoor etic meeting for the schools will be in Mechanics Building, Boston, on riday afternoon. Pag. 26, 1827.

### Landis Expected to Be Re-elected

Baseball Has Flourished Under Judge's Leadership-Meeting in December

of government in the major league NEW YORK, Nov. 20 (P) Fixing of the professional game with its pres the American open golf championship for June 23, 24 and 25 at the Oakmont ent leader, K. M. Landis, for the next seven years, will be ascertained at the joint meeting of the two leagues, Na-tional and American, held in Chicago, gauntlet to the Royal and Ancient Golf Club of Great Britain in an international conflict over tournament dates which now threatens the entire program of 1927 competition between the missioner, to re-elect Landis, or, as missioner, to re-elect Landis, or, as some followers are inclined to think, to abolish the office altogether, now

the two premier fixtures thus conflicting for the first time in years and rendering impossible the participation of players from either country in both events. Hitherto it has been customary for the tournaments to be cited that the two leagues have regained their harmonious relationships and the game is on a sound basis once more. Of the success of the commissioner form of government under Landis, there is no question. During his there is no question. During his re-gime the game has flourished perhaps beyond the highest expectations for so short a span of time as six years since the establishment of the office of com-missioner. When the office was estabmissioner. When the office was established, it was not known how long it would remain as the governing factor in baseball; but it was mainly originated for the purpose of doing something to maintain the confidence of the baseball public following the World Series "scandal" of 1919. Now that has performed his duties to the satisfaction of the majority, there is some belief that some of the powers that go with the office of commissioner will be taken away. There is probably no office in existence in any business or office in existence in any business or the same across the Catalina waterway.

go with the office of commissioner will be taken away. There is probably no office in existence in any business or office in existence in any business or governmental organization, which entrusts so much power to one official as baseball gives to the office of commissioner. Landis' has performed his work with confidence, good judgment and perception. His quick action in meting out justice in the J. J. O'Connell-Alfred Dolan affair, preceding the 1924 World Series, was accomplished so effectively that the case was soon forgotten, and the majority of followers believe that the professional game of baseball has been in proper hands. That the present form of government has been and should continue to be a boon to baseball is undoubtedly the contention of the majority of followers and is, apparently, going to re-

the contention of the majority of followers and is, apparently, going to receive the sanction of the club owners to at the coming meet. The National League, especially, is believed to be unanimously in favor of the retention of Landis. The American League will not be wholeheartedly behind Landis because of his difficulty with its president, B. B. Johnson, during the last two years or so, but he is almost certain of the support of enough of the American club owners to assure him a return to the office.

a return to the office.
On Nov. 12, 1920, the office of commissioner was established and Judge Landis, then a judge in one of the district courts whose name is associ-ated with the case against the Stand-ard Oil Company, in which he imposed a fine of 329,000,000, was named com-missioner. He tried to carry both posi-tions, judge and commissioner, but soon found it advisable to devote all

his time to baseball. The rule in the baseball catalogues states that the term of office of a commissioner shall be for seven years that a commissioner can succeed himthat a commissioner can succeed him-self by obtaining a majority of votes of the clubowners. As no one has been mentioned to succeed him and as his support in one league is practically unanimous, with a sprinkling of votes expected from the other, Landis is almost certain to be re-elected. At any rate, the coming meeting will be one of the most interesting for baseball

ATLANTA, Ga., Nov. 20 (AP)—Robert
T. Jones Jr., American and British
open golf champlon, said last night
that unless his business interfered, he
would defend his American golf title
at Oakmont, Pa., next June. He announced several weeks ago that he
would not defend his British title due
to pressure of business.

Jones said also that business permitting, he would seek to ratrieve the
amateur title which he lost to George
Von Elm of Los Angeles, last summer. other seven-year term.

#### MAORIS VISIT ETON AND WINDSOR CASTLE

LONDON, Nov. 20—The Maori Rug-by footballers from New Zealand who will today enter upon one of the most exacting tests of their tour against the Black Heath Club, spent a particularly happy time this week they say for, in happy time this week they say for, in addition to playing an exhilarating drawn game with Northampton of six points (two tries) each, they visited Eton Collège and fulfilled their great desire to see a contest at the "Wall Game" peculiar to that seat of learning. They were also conducted over Windsof Castle.

These Maoris may not be so spectacular off the field as were their predecessors in 1888 insomuch as they do not go about complete with native

lo not go about complete with native trappings, but they have charmed rugger followers by their keenness and originality on the field and can be written down as one of the most popular and picturesque football sides ever to come to the motherland from the dominions. To date they have played 10 games, won four, drawn two and lost four, aggregating 78 points against 74.

### TABER CLAIMS CATALINA SWIM

August State State

Reports Covering Distance of 22 Miles in 14 Hours 28 Minutes

HUNTINGTON BEACH, Calif. Nov. 20 (P)—W. G. Taber, a product of the "Ole' swimmin' holes" of the Hudson River of New York State, crawled out of the Pacific here yesterday with the announcement that he had swam the Catalina Channel, which heretofore has been uncrossed by a single swimmer. The channel is about 22 miles wide.

Taber, an oll worker formerly

Taber, an oil worker, formerly lived at San Bernardino after coming to California from the East.

The occupants of two motor boats testified they had accompanied the swimmer. One of the craft was piloted by Miss Helen Fee of Hellswood and

Diego,
Taber reported that he went into the
water at Santa Catalina Island at 2.36 o'clock yesterday afternoon. He waded ashore here, he said at 4:03 'clock this morning.

The oil working swimmer was mod-

the same across the Catalina waterway, "and so I did," he added.

All the nourishment he had during the trip, he said, was some bouillon cubes. He greased his body-thoroughly for the event.

### Meeting to Discuss "Big Three" Break

#### Daley of Harvard and Prendergast of Tigers Will Attempt to Correct

elations, will come this morning when Leo F. Daley '27, president of the Harvard student council, and Joseph Prendergast '27, president of the Princeton senior council, will meet in-

The move is "to discuss the possi joint meeting of representative com nittees of the two councils.

mittees of the two councils."

Whether or not Yale University will have a representative present is uncertain. James O. Flower and Russell L. Post, presidents of the students councils, respectively of Sheffield School and Yale College, invited the Harvard and Princeton councils to meet in the offices of the Yale College council, following reports from Princeton that the Harvard body had proposed such a meeting to talk over the situation.

situation.

The Yale student officers make it clear that Yale is interested, for the sake of the late "Big Three," in anything which may lead to renewal of the old relations, but that Yale does not wish to thrust herself forward in the affair. From its standpoint, Yale is proffering the courtesy of any possible convenience for the benefit of Harvard and Princeton, for the sake-of mutual friendliness and old associations with both.

A and American League Bageball
Clubs in December there is expected to be a great number of trades
and changes made. President J. A. R.
Quinn of the Boston Red Sox has announced his intention of making a choice or new manager not earlier than the irst of December. And it is very likely hat the new Red Sox manager will be unnounced during the league sessions. announced during the league sessions.

There is a large number of players that fans are still wondering as to what they are going to do and where they are going. William B. McKechnie is still out of a position in baseball. T. R. Cobb, former Detroit veteran, is out of baseball ranks at present. J. F. Fournier, Brooklyn first baseman, has left his club and has not been signed by any other yet. George H. Sisler, who is no longer manager of the Browns but is still first baseman, is expected to be released to another club. E. T. Collins, still a great second baseman, has been placed on the waiver list. Some of the men may be changed or located before the league meetings are over.

Some followers have E. T. Collins, former manager of the Chicago White Sox, coming to the Boston Red Sox as manager and second baseman. And in Boston it is the general consensus of opinion among the fans that it would be a good move for the Boston club to make. Collins is an enthusiastic worker, a conscientious player, and keeps up a steady flow of talk on the diamond that spurs the players on. It is also believed that what the Red Sox need is a playing manager.

The rumor that John F. Collins,

Des Moines to a pennant last year.

There is much of interest to look forward to in baseball for next year. The efforts toward success made by at least six new pilots will draw the most interest. What Detroit will do without. Cobb? Where the Phillies will finish with John P. McInnis as leader? What Daniel Howley, former Toronto manager can do with St. Louis? Where George H. Sisier will finish in league hitting without having to trouble with the problems of manager? Where the Red Sox can finish with a different leader? These are only a few of the topics of general interest which are keeping the fans busy talking this winter.

There is a chance that J. F. Fournier

base.

The Red Sox will be a much different looking team next year. With Paul Wanninger at shortstop, F. C. Hoffman and G. C. Hartley, veterans, behind the bat, all former New York players, the Boston club should show much improvement. Ira Flagstead, W. C. Jacobson and D. W. Shaner in the outfield should make a fine combination. If only E. T. Collins was at second base, Boston would look like a genuine contender for fourth or fifth place at least. And that would be part, at least, of the improvement that Boston fans have been expecting for some time now.

### YALE'S CHESS TEAM

sity at Ithaca; 21—Columbia University; 16
at New York; 28—University of Pennsylvania; March 2—Princeton University at Princeton; 5—Cornell University at Princeton; 5—Cornell University at Princeton; 5—Cornell University.

Ralph H. Wilbur is credited with a hole-in-one made Friday on the 120-yard fifth hole of the Bear Hill Golf Club Wakefield, Mass. This green is completely surrounded by traps. J. Victor Hay and F. Leighton accompanied Wilbur around the course

### WACHTER HAS A REAL TASK FINDING A CAPABLE CENTER

Leekley May Play Center

Rauh's Graduation Causes Vacancy-Thackaberry and McCurdy, Logical Contenders for the Position, Are Ineligible

Harvard University basketball fol- difficulty in obtaining that great factor Harvard University basketball followers are not facing the imposing Crimson schedule for the coming season with any great degree of confidence, due to the fact that the names of four players who had been counted upon to offset the loss of W. T. Smith '26 and C. J. Rauh '26, by graduation, have appeared on the ineligible list. With these players the outlook would be quite promising, but without them, Coach E. A. Wachter has a task on his hands to produce a quintet that can maintain the reputation established by last year's team, which won eight out of 12 contests and defeated Yale University after a closely fought game, 18 to 17.

The graduation of Rauh, star center, leaves Wachter with the problem of finding another pivot man and his hopes have rested chiefly upon Beniam that 4:03 as modars which won last year, and J. R. McCurdy '28, who yus substituted for Rauh on last year's varsity and showed much promise. But both of these men are now influence in the ligible to play because of studies. J. W. Baldwin '28, who was captain of his freshman team two years ago and who had previous experience before lowers are not facing the imposing in a successful basketball team—team—work. Therefore, the loss of Rauh will be felt keenly, as neither Green nor

who had previous experience before going to Harvard, and S. C. Burns '29. a star on last year's freshman team at forward, are the other men that are

lost to the varsity this year through deficiency in studies.
"I do not know who I will use at center now that Thackaberry and McCurdy are ineligible," said Coach Wachter. "I can tell better after I was the men in action this search.

at the position."
The two that Coach Wachter spoke about are J. H. Lane '28 and M. M. Green '28, both of whom had experience during their freshman year at the center position, but neither of whom has managed to make the varsity since.

Freshman Material Lacking 'A team that loses two of its best men by graduation should have some promising material coming up from the freshman class if it is going to be NEW HAVEN, Conn., Nov. 20 (AP)—
The first step in what many hope will result in reconcillation between Hartovard and Princeton Universities, folThackaberry and Burns ineligible, wing the recent parting of athletic elations, will come this morning when eo F. Daley '27, president of the Har-squad. The team was not a very strong one, as its record shows. Therefore we must draw on last year's second-string men for our varsity team this season and trust that some freshmer stitutes. Everything is very uncer-

> The team to start with will be weaken this year at center than it was a year ago, for Rauh was an experienced veteran and played one of his finest seasons in his senior year. It would have been much better had the Crimson lost another forward, for the center position is one of the most important on the team and generally requires a man of much experience. An experienced man at center is a good nucleus for a team to be built around; but an inexperienced man there often causes

### Cardinals to Have Fast Hockey Team

No Veterans, but Candidates Are Showing Great

Special from Monitor Bureau CHICAGO, Nov. 20—Speed provided by young amateurs who are just turning professional in joining this team, is expected to feature the play of the Cardinals, the Chicago organizaof the Cardinals, the Chicago organization in the American Hockey Association, which opens its league schedule
at the Coliseum here Sunday night
with the Detroit Americans. There is
not an old professional on the team,
declared H. J. Caldwell, club secretary,
in an interview here outlining the
prospects of the squad.
Russell Stephenson, forward, formerly of the Aura Lee championship
team, has been appointed captain.
Other forwards signed are Gordon
Brydson from the Toronto Canoe Club;

Brydson from the Toronto Canoe Club; Robert Burns, of the Preston team in the Ontario Hockey Association; Ar-thur Clark, formerly of the Grimsby team in the O. H. A. finals; Harry Reid, Hamilton Tigers, Allen Cup champions, and O. H. A. finalists, and Stuart Dunning of Toronto. Of this forward crew two youngsters

are expected to shine. They are Burns, a big and rangy athlete, who developed last year. The other is Dunning, who came unkown to the recent practice sessions of the team in Toronto and asked for a tryout. While lacking ex-

up Michael Brophy of the Collingwood, Ont., championship finalists; Edward Vicar of Grimsby, Marvin Wentworth of the Windsor Hornets, and Ralph Taylor of the Toronto Canoe Club.

For goal only W. R. Fisher is named, but there will be others available for the post. Fisher is a former goalie of the Grimsby sextet.

R. W. Scott, formerly of the Aural Levis to the company of the Carlingle.

Lee team, is manager of the Cardinals, and John Dwan of Toronto has been appointed coach.

Among the Chicago backers enlisted by E. J. Livingstone, the Toronto promoters who obtained the Chicago franchise, are H. F. Riley, equipment manufacturer; W. J. Porter, contractor, and H. M. Pulsifier. It is expected that Porter will be elected president of that Porter will be elected president of

### **FARRELL-BARNES**

PINEHURST, N. C., Nov. 20 (AP)-J M. Barnes, former British open champion, and John C. Farrell, Quaker Ridge Club, Mamaroneck, won the mid-winter southern best ball championship yesterday by adding 33—35—68 to their 66 of Thursday for a total of 134.

R. A. Cruickshank, north and south R. A. Cruickshank, north and south champion, and Patrick Doyle of Elms-ford, N. Y., were second with 136. The Armour brothers, Thomas and Alex-ander, from the Congressional Club, ander, from the Congressional Club, Washington, and Fred McLeod, Co-lumbia Country Club, and Emmett French, Southern Pines, tied for third with scores of 137 with scores of 137.

ANOTHER 100,000-CROWD GAME ANOTHER 100,000-CROWD GAME

Special from Monitor Bureau
CHICAGO, Nov. 20—Another 100,000
football crowd is expected by the South
Park Commissioners here for Soldiers
Field Stadium, next year, when the
United States Military Academy comes
here to meet University of Notre Dame.
The field has just been increased to a
total capacity of 100,000 for the game
here Nov. 27 between the West Point
team and the United States Naval
Academy. The recent West PointNotre Dame game in New York drew
70,000 and it is expected that there will
be no trouble filling the stadium here.

# Dec. 17—Boston University. Jan. 8—Massachusetts Institute of Technology; 12—Clark University; 19— Worcester Polytechnic Institute; 29— Connecticut Agricultural College. Feb. 5—Williams College; 9—Holy Cross College; 12—Dartmosth College at Hanover; 16—Brown University at Providence; 19—Open date; 23—University of Vermont; 26—University of Maine. March 2—Springfield College; 5—Value March 2-Springfield College; 5-Yale University.

University of North Carolina, the team which furnished Harvard followers with some interesting basketball during the past two years. The southerners were not coming North this year and a game could not be scheduled.

Four New Teams Scheduled

President Charles F. Adams of the Boston Bruins was presented with two bear cubs just before the start of the game. The presentation was from the employees of the John T. Connor Company, of which he was president.

George Horne, right wing of Montreal Maroons and formerly with the Grimsby Intermediates, champions in 1924-25, has been loaned to the Stratford Club in the Canadian Hockey League until Jan. 31, when he may be recalled. After that date he cannot be recalled this season. Canadiens will have a valuable de-fense man in Mantha if Coach Cecil M. Hart can restrain that player's inclina-tion to roughness. Mantha retailates a check in such a manner that the referee has no alternative but to put him off the lice and the Canadiens were weakened exactly four times against Boston be-cause of Mantha's thoughtlessness.

of the C H, L.

According to paper figuring. New Haven will have a powerful team in the Canadian-American Hockey League with such stars as Harrington, Cahill, Roberts and Mitchell from the Bruins; Stephen Yankowski of Minneapolis, Joseph Debernardi of Cleveland, Wilfred and Stanley Veno, and possibly Norman Shay back again.

Shay back again.

The Canadian Hockey League certainly got away to a fine start in Windsor, Monday, when Hamilton won an overtime game with the Windsor Hornets by a score of 2 to 1. The fact that teams are evenly matched usually insures the league of a successful season.

season.

Sweden has cabled the Victoria hockey team of the Quebec Amateur Hockey Association renewing the request to have that team visit the country for exhibitions. A guarantee of all expenses is offered and the team would play five games in Sweden, two in Berlin, Germany, and one in Vienna, Austria. The game between the New York Rang-ers and Montreal Maroons last Tuesday opening the Montreal Hockey League season in the New Madison Square Gar-den, drew a gate of \$29,991.

#### TWO PLAYERS REACH THE ROUND OF EIGHT

NEW YORK, Nov. 20—Two players reached the round of eight yesterday in the United States fall squash tennis tournament at the New York Athletic Club, the other matches in the third round going over to next week on account of impending football games or other engagements.

Both were in the nature of surprises, as each of the losers were listed in the second 10 at the end of last season, while the winners were in the third group. Frank M. Loughman of the New York Athletic Club disposed of Armin W. Riley, Princeton Club, in a hard-fought three-game match, 12—15, 15—2, 15—4; while Morris M. Phinney, Harvard Club, defeated the champion of the New York Athletic Club, Robert E. Hughes, formerly a Montclair Athletic Club star, with ease, 15—7, 15—7.

By the Associated Press

### CLASS B TEAM LEADERS WIN

Columbia U. C. and Yale Club Advance in Squash Tennis Race

> METROPOLITAN INTERCLUB SQUASH TENNIS (CLASS B)

Lane has played to any great extent

Those followers who have watched the Harvard five during the past two years are inclined to believe, however, on their own logical reasoning that J. D. Leekley '27 will be shifted from his position at forward to center at the start of the season. During 1925, he played center at various times with some degree of success and although he is a fine forward, the urgent need for a center may cause his being shifted.

The guard positions will be well taken care of with three veterans available—J. S. Malick '27, W. A. Coombs '27 and J. N. Barbee '28. One look at the record of Leekley for last year is enough proof that he is practically certain of one of the forward positions if he is not placed at center. His playing has been of the stellar type and he is considered one of the most accurate basket shooters on the squad. Who will make the other place at forward is another problem to be solved by Coach Wachter. There are three men available: Kenneth Dorn '27. S. L. Eaton '27, and A. W. Slocum '28, with the choice leaning toward Slocum who was a star on his fresh-NEW YORK, Nov. 20—The two unbeaten leaders, Columbia University Club, present champions, and Yale Club, continued their victories in the fifth round of the first half of the metropolitan Class B squash tennis team championshp, yesterday, when the former disposed of the Interfraternity Club, previously tied for third place, 5 matches to 2, and Yale Club defeated Montclair Athletic Club, by the same score. Both winners had the advantage of playing at home.

New York Athletic Club, previously in the third-place tie, took its match from Princeton Club on the courts of the latter, by the top-heavy score of to 1, only the failure of S. R. Greene to arrive in time making a clean sweep impossible. Harvard Club ended its match against Crescent Athletic Club with a margin of 6 to 1, while the Gramercy Park Club ended its match against Crescent Athletic Club with a margin of 6 to 1, while the Gramercy Park Club ended its occupancy of last place by defeating Short Hills, previously tied with it, by the margin of 4 to 3.

Two former stars of the champions made successful debuts for the season yesterday, when W. D. L. Starbuck, a standby of former years, defeated W. B. Hervey after a hard battle, 3—15, the start of the season yesterday, when W. D. L. Starbuck, a standby of former years, defeated W. B. Hervey after a hard battle, 3—15, the start of t NEW YORK, Nov. 20-The two un-127, S. L. Eaton 27, and A. W. Slocum 28, with the choice leaning toward Slocum who was a star on his freshman team two years ago. And then there is the possibility of Barbee being shifted to forward, as a year ago it was believed that he might develop into a better forward than guard.

With Yale University and Dartmouth College there are two Intermouth College, there are two Inter-collegiate Basketball League mem-bers on the schedule. The program although considered measurably stronger than last year, is minus the

standby of former years, defeated W. B. Hervey after a hard battle, 2—15, 15—10, 15—12, and N. N. Alexander, captain two years ago, disposed of H. K. Sayen, 15—3, 18—15. Both lacked practice, but each should help the team materially in the hard matches to cgome. The summary:

S. R. Jandorf, Interfraternities, won from J. L. Kerbeck, Columbia U. C., by default.
R. H. Reutter, Columbia U. C., defeated H. P. Cole, Interfraternities, 15—6, 11—15, 15—8. Amherst College and Colgate University, on the schedule last season, are also missing; but in their places Harvard has scheduled University of Maine and Boston University and in -8.
Milton Baron, Interfraternities, deted Gardner Hirons Jr., Columbia U.
12—15, 15—11, 15—7.
D. W. Haines, Columbia U. C., defeated
E. Wilson, Interfraternities, 15—5, Maine and Boston University and in addition, two extra teams. Clark University of Worcester and University of Vermont. The schedule comprises 14 games, two more than last season. The first game is with Boston University on Dec. 17. The Yale game will be played last this season. In the previous season, two games were played after the Yale contest. The two big rivals meet March 5. The first call for candidates is set for Nov. 22, Coach Wachter said. The varsity schedule follows:

Dec. 17—Boston University. 15—2.
W. D. L. Starbuck, Columbia U. C., defeated W. B. Hervey, Interfraternities, 3—15, 15—10, 15—12.
H. G. Larson, Columbia U. C., defeated C. R. Smith Interfraternities, 15—5, 15—7.
N. N. Alexander, Columbia U. C., defeated H. K. Sayen, Interfraternities, 15—3, 18—15.

15-3, 18-15.

Yale Club, with its new discoveries, who play both in Class B and C, had an easy task conquering Montclair Athletic Club, though Felix A. Jenkins, a former Class A star, defeated the leader, L. H. Sonneborn, after a hard struggle, 4-15, 15-5, 15-13, and Robert Messer, the young star of the New Jersey team, defeated M. M. Zimmerman, who had been substituted at the last minute, for K. R. Smith. The summary:

New York Athletic Club, which has now settled into its stride, kept pace with the leaders in brilliant fash(on, when it visited the Princeton Club courts, and did not allow a single match of the six played to be scored against it, losing only one, by default. Every Mercury Foot victory was in straight games. The summary:

W. E. Chambers, N. Y. A. C., defeated Edwin Muller, Princeton Club, 15—10, 15—9.
E. L. Maxwell, Princeton Club, won from S. R. Greene, N. Y. A. C., by default.

C. F. Fuller, Harvard Club, defeated E. W. Kleinert, Crescent, 7-15, 15-7, E. W. Kleinert, Crescent, 7-15, 15-7, 15-11.
G. B. Woods, Harvard Club, defeated J. W. Ivins, Crescent, 6-15, 15-5, 17-16.
E. P. Cyplot, Crescent, defeated F. W. Dort, Harvard Club, 10-15, 15-7, 15-11.
J. A. Milholland, Harvard Club, defeated H. R. Burroughs, Crescent, 15-11, 7-15, 15-7.
C. J. Mason Jr., Harvard Club, defeated A. R. Perpail, Crescent, 15-8, 18-12.
F. M. Warburg, Harvard Club, defeated E. W. Arnold, Crescent, 15-1, 15-7.
G. A. Brownell, Harvard Club, defeated T. H. S. Andrews, Crescent, 15-3, 15-10.
The Gramercy Park Club, which has

The Gramercy Park Club, which has been unable to win heretofore on ac-count of lacking a practice court, managed to take the odd match from Short Hills, on the court of the Army and Navy Club, which it has been using lately. The summary:

R. F. Pearson, Short Hills, defeated L. A. Sigaud, Gramercy, 12—15, 15—9, 15—5. 15-5.
E. H. Heminway, Gramercy, defeated J. R. Montgomery, Short Hills, 6-15, 15-5, 17-16.
E. A. Clark, Short Hills, defeated J. A. Rauh, Gramercy, 11-15, 15-1, 15-8.
Eric Gugler, Gramercy, defeated G. L. Lewis, Short Hills, 15-10, 10-15, 15-12.
J. K. Smith, Gramercy, defeated G. Y. Waufman, Short Hills, 15-16, 15-18-11.

C. C. Pyle may break into the professional hockey field. The promoter, now
manager of Mile. Suzanne Lenglen and
Harold E. Grange, is reported negotiating
for the Toronto St. Patricks of the National Hockey League with the idea of
transferring the franchise to Philadelphia. The barrier may be the price of
\$200,000 said to have been placed on the
Canadian club.

ROBINSON TO QUIT PRESIDENCY

NEW YORK, Nov. 20 (\*\*p)—Wilbert Robmanager-president of the Brooklyn National League Baseball Club next season.

He has not yet resigned his presidential
duties but is expected to do so before
the club's spring meeting to devote his
entire time to olloting the team on the
field.

### Football Sidelines

By contributing two touchdowns to the 31-to-0 victory of University of Minnesota over Butler University last Saturday, H. W. Joesting '28, Gopher full-back, claimed the scoring leadership of the "Big Ten." Jeesting now displays 72 points, made on 12 touchdowns. M. G. Karow '27, captain and halfback at Ohio State University, is second with a total of 66 points on 11 touchdowns.

Its twenty-second victory was scored by Bradley Institute at Peoria, Ill., last Saturday in defeating, 12 to 0, the Illinois Wesleyan College. Bradley began winning in mid-season of 1924. Two more games remain on this season's schedule, Eureka College next Saturday and Franklin College on Thanksgiving Day.

When 30,400 people crowded into the

at Chicago, for which 100,000 seats have been sold.

If he maintains the promise of his games this year, V. W. Gustafson '28, halfback, may become the outstanding star of the football team at Northwestern University next season. While somewhat overshadowed this seasoh by the reputation of R. C. Baker '27, Wildcat captain and triple-threat halfback, Gustafson took the team lead in scoring with 49 points on 8 touchdowns and an afterpoint. His three touchdowns against University of Chicago, including the '90-yard dash for touchdown from the opening kickoff, won him a permanent place in the "Big Ten" hall of fame.

### ANNUAL H-Y GAME FULL OF INTEREST

nual football game, which took place in the Yale Bowl this afternoon, could be distinguished either as regarded the number of persons planning to witness the spectacle or the enthusiasm in the

had resulted in the scores. Yale had I all the better of the argument up to 1912, as the Elis won no less than 22 of the 32 games played up to that I year. Harvard had won only five, the other five having been tied.

Beginning with the year 1912, Harvard made a splendid showing, winning eight of the nine games up to and including 1922, Yale's only victory in that period coming in 1916. Yale won

by the punt, two types of play which have furnished spectacular features in games of the East.

The Wisconsin-lowa game of last Saturday gives a good example of what can be done with the forward pass as against a rushing game. Wisconsin won, 20 to 10, and gained most of its ground by means of the forward pass, while lowa made 20 first downs by rushing alone.

Seven members of the Yale varsity eleven won their "Y" for the first time in the Princeton game Saturday, only two of them being linemen. A. M. Look 27, center, and F. B. Ryan Jr., '28 tackle were the forwards. The five backfield players were J. J. Hoben '25, William Holabird 3d '278, E. A. Goodwine '25, A. Brandenburg '29 and J. D. Cox '288.

Reports were pretty current that after Harvard and Yale had filled their applications for tickets to their big football game in the Yale Bowl Saturday, there were some left over, but it seems that extra applications took up all those left over and it does not look as 'if there would be any vacant seats next Saturday.

Dartmouth College has awarded 17 football letters this fall. Those receiving the "D" are: Capt. N. M. Horton '21. Daugherity 27, University of Illinois and natives of Milwaukee.

Streator (III.), the home town of R. S. Daugherity 27, University of Illinois fullback, will send a delegation of 250 fans to cheer, him in the Ohio State-Illigois game, his final gridiron appearance.

## played in rainstorms, and last year's result was a scoreless tie. Yale is credited with making the biggest score in a game in 1884, when the Ells won from the Crimson, 48 to 0. Harvard's best score was made in 1915, when the Crimson won 41 to 0. Harvard-Yale Winners

E. L. Maxwell, Princeton Club, won from S. R. Greene, N. Y. A. C., by default.

J. C. Rochester, N. Y. A. C., defeated F. S. Whitehouse, Princeton Club, 15—3, 15—4.

Barnwell Elliott, N. Y. A. C., defeated W. N. Rothschild, Princeton Club, 15—4, 15—4.

B. W. Richert, N. Y. A. C., defeated J. H. Ardrey Jr., Princeton Club, 15—4, 15—4.

J. C. Lyons, N. Y. A. C., defeated J. H. Ardrey Jr., Princeton Club, 15—5, 15—12.

J. C. Lyons, N. Y. A. C., defeated J. H. Ardrey Jr., Princeton Club, 15—6, 15—12.

J. C. Lyons, N. Y. A. C., defeated H. D. Chaplin, Princeton Club, 15—6, 15—15.

Harvard Club, which has lacked the dassistance of many of its former stars so far this season, added another to its lineup yesterday, when F. W. Dort, a standby of last season, made his appearance. He lacked practice, however, and was defeated by the veteran, E. P. Cypiot. The other members of the Harvard Club team came through, however, making the score 6 to 1. The summary:

C. F. Fuller, Harvard Club, defeated E. W. Kleinert, Crescent, 7—15, 15—7, 15—11.

Woods Harvard Club, defeated E. W. Kleinert, Crescent, 7—15, 15—7, 15—11.

Woods Harvard Club, defeated E. W. Kleinert, Crescent, 7—15, 15—7, 15—11.

Woods Harvard Club, defeated E. W. Kleinert, Crescent, 7—15, 15—7, 15—11.

Woods Harvard Club, defeated E. W. Kleinert, Crescent, 7—15, 15—7, 15—11.

B. W. Richert, N. Y. A. C., defeated the United States. The crowd began assembling yesterday afternoon with the spectady afternoon with the theoles and lodging houses, as well as private dwellings houses, as well as priv

Yale 25. Harvard 13. Ties 6.

## Prestige and Profit

"Goods advertised in newspapers are superior to non-advertised goods!" This is the conclusion of a Better Business Bureau

that has been checking up newspaper advertising in an Eastern city. Careful comparisons were made of advertised goods

and similar lines that were not advertised. In 95% of the cases, the Better Business Bureau reports, the advertised articles were superior in quality

to the non-advertised articles. Good news for newspaper readers, of course, but most of them know it by experience.

How about the national advertiser who is seeking that elusive thing called "prestige"? A manufacturer's brands are in the best company

when they are in the advertising columns of the daily And since newspaper advertising sells goods, news-

If one thing more than another was made apparent at the second annual session of the

New England Discusses Ways and Means

New England Conference, held this year at Hartford, Conn., it was that those representing the varied industries of the six states participating have become convinced that it is only as

a basis of complete and unselfish co-operation is reached can the welfare of the people and of the industries of the section be protected and advanced. At this meeting, as at the first, held a year ago in Springfield, Mass., no secret was made of the fact that New England has serious economic and industrial problems which must be met and solved. For a century or more the leader in many productive industries, the people of that section have awakened to a realization that with the movement of distributing centers and buying populations toward the West and South there has gradually taken place a decentralization of productive industry. Many conditions have combined to bring about the change. One of these is the cost of transportation on both raw materials and finished products. Another is the higher cost of living in the eastern states compared with that in many sections of the West and South, this being reflected directly in the demands of workers for proportionately higher

It may be that however thoughtfully and studiously these problems may be dealt with, it will not be found easy to work out a satisfactory solution. The conditions described appear to be basic or fundamental in their nature, presenting an equation which must be accepted as fixed, and around which all practical or theoretical expedients must be arrayed. In an address by Owen D. Young, chairman of the board of the General Electric Company, read at the meeting, these and other conditions were described as barriers which must be overcome by such economic co-operation among the New England states as will break them down, thereby insuring the maximum use of the resources of the section for its own development. These barriers, it was pointed out, may be the physical barriers of hills or distance, which can be broken down by a row or two of poles or of steel towers with a few copper wires, or they may be the unseen barriers of laws and habits.

There are gratifying indications that it is the serious purpose of these conferences to remove these tangible and intangible barriers. It is probable that it will be found a simple task to set the poles, build the steel towers, and string the copper wires over the hills and across the valleys. At the Hartford meeting the chairman of the power committee of the conference, Edward O. Goss, who is president of the Scoville Manufacturing Company of Waterbury, Conn., offered what may be found to be a practical and extremely helpful proposal along this line. Briefly, he advises that measures be adopted conferring upon the public utilities commissions of the six New England states joint jurisdiction over rates charged for power transmitted over state lines. This could be accomplished, he declares, by the voluntary agreement of all New England power companies to abide by decisions thus jointly arrived at. Other speakers, in commending and generally approving the plan of joint regulation and control, urged the advisathe present laws, with the view of bringing about greater uniformity.

It is by these opportunities for free and open discussion of the physical problems vital to the welfare of the people of the northeastern Atlantic coast section that their importance will come to be appreciated and ways discovered for their satisfactory solution. And it should be remembered that by the same simple method it will be found possible to remove those intangible barriers to which significant reference has been made. They offer no substantial resistance.

It is but comparatively recently that the idea of international friendliness has come promi-

Establishing a Standard of World-Mindedness

nently before the public thought. A few decades ago at most, nationalism ruled the consciousness of the various peoples of the globe. The World War, while it stirred up conditions to such a pitch that for a time it

seemed that the most intense nationalism that has ever been known was the predominant motive with many, at the same time wrought out a sense of brotherliness that was quite new to some. And since the armistice, though the world thought has swung from one extreme to another at times, evidences are constantly being seen that a different point of view from any ever before held by nations as a whole is being entertained more and more in the direction of

international co-operation and friendliness. One reads with interest, therefore, but not surprise, that in Chicago recently was held a second annual dinner sponsored by the Chicago Church Federation, at which students from other lands attending schools in the city were the guests. And one learns with approval that North America's message to the international gathering, delivered by Frank Garrett Ward of Toronto was a plea for a new loyalty, larger than patriotism, a loyalty "to the good of all." "We students," he declared, "must insist that this standard of world-mindedness be established

first of all in ourselves." This idea of unfolding in individual consciousness the recognition of internationalism, while not new, is vital in its significance. So often it is forgotten that a family, a community, a nation, is simply an aggregate of individuals. A so-called collective consciousness is merely the sum total of the thought of the individuals comprising the group designated. It rises no higher and sinks no lower than does the consciousness of those who compose its integral parts. Hence if a change in that consciousness is sought, that change must come through a regeneration of individual consciousness. And when a larger sense of world friendliness is aimed for, the idea must find its inception in the thought of first

one and then another before it can become a part of the consciousness of a people or of the world itself.

There is little need for enlarging on this thought other than to urge that every encouragement be given to those estimable efforts being put forth to counteract the selfish nationalistic beliefs of the past with a broad internationalism that must be a prominent feature of the future. Hence one can give commendation to what Dr. Albert W. Palmer, pastor of the First Congregational Church of Oak Park, Ill., said, speaking for the hosts of the banquet, when he urged students to welcome international problems as opportunities for cooperation. "International friendships," he declared, "are promoted by solving problems as we meet them." For, as he doubtless intended to convey, by such a course one learns that there is a common basis of humanity.

The discussion of the relationship of newsraper reports to the spread of crime which the

A Word From a/Prison

Monitor reprints in another column from the Echo, published by inmates of the Western Penitentiary of Pennsylvania, has somewhat the authority of expert testimony. In this respect

it does not stand alone, for police and prison officials all over the land continually report a similar sentiment existent among those who come under their observation.

Expert surveys, like that which the Rockefeller Foundation conducted in Cleveland, O., add further corroboration to the evidence that crime news engenders crime. Indeed, any student of the responsiveness of the human mind to suggestion, however hurtful, needs little concrete evidence to convince him that the persistent glorification of criminals in the press, the publication of their portraits, the use of laudatory, or at least striking, nicknames, and the growing practice by "feature writers" of spreading the views and the exploits of criminals all over the Sunday papers stimulate, encourage and increase crime.

Certain New York newspapers at this moment are devoting from three to five pages daily to the publication of the verbatim testimony in a criminal trial in a neighboring state. For this there is not the common excuse offered for the publication of crime news. Nobody will claim that the search of that New Jersey court for truth is being aided by the publication of the testimony vividly decorated with comments and descriptive writing by practiced sensationalists of the daily press.

Elsewhere in the Monitor today will be found expressions of leading Chicagoans concerning the overemphasis of criminal news in their local papers. In no city is there greater intellectual activity than in Chicago. None has undertaken so great a work of beautification as the "Chicago plan." Nowhere are public benefactions more liberal, nor can such monuments to public enterprise as the Field Museum, the Wacker Drive, or the Rosenwald Museum, now in the early stage of development, be paralleled in many cities. Yet a great part of the press in Chicago finds its chosen field of activity in the vivid reporting of crimes of violence. The effect upon the reputation of the city throughout the world is little less than disastrous.

Newspaper editors and publishers all know and all are constantly declaring that the great problem of journalism is to find space for all the matters of interest which demand tion. In view of this, one can only wonder at the editorial judgment which selects a criminal trial as the most important news of the decade -for we can recall nothing else, not even the election, which has been "covered" with such minute particularity and to which space has been so lavishly allotted. Certainly nothing of an educational, religious, or economic nature has been thus dignified by the New York press.

The editors of the prison newspaper, which the Monitor quotes, say, "To speak of them as primers of crime would be mild. If we were seriously bent on compiling a handbook of crime for the use of criminals, all necessary material could be taken from our daily newspapers." True, from this general indictment three outstanding papers are omitted-one of which, we regret to say, gave twenty-four columns of small type yesterday to New Jersey's combination of vaudeville and criminal justice. But we believe that many papers other than those mentioned are beginning to question the value of crime news, or at any rate to compare in a spirit of doubt and inquiry the value of circulation obtained through it with that of circulation based on more important contributions to the knowledge and welfare of the community.

For the moment, there may seem to be great material prosperity ready to the hand of the publisher who is willing to purvey for profit the news of the gutter and the slum. But no enduring edifice of prosperity can ever be based upon crime-either upon its commission or its exploitation for profit.

Coming as a natural sequel to the announcement that airplanes operated in connection with

Changing Cars at "Airplane Junction"

the service rendered by the American Railway Express will be employed in the transmission of valuable or perishable matter as adjuncts to the service rendered by railroads and steamships, is the quite definite pro-

posal that arrangements be made for the carrying of passengers also. Just as in the movement of mail and express matter, the saving of time is the item of major importance. It is proposed that at the chief junction and terminal points along the trunk and transcontinental railroads, airplanes shall be provided for the use of passengers who desire greater haste than the older

service affords. William P. MacCracken Jr., Assistant Secretary of Commerce for Aeronautics, in discussing this project recently in Washington, said that the encouragement which American business men are giving to commercial aviation is providing a tremendous impetus to air transportation for purely commercial purposes. He expresses the belief that within a short time passengers will be regularly carried. "And this new develop-ment," he says, "can be expected to precede the most extensive expansion of commercial aviation.'

So it may eventuate that those sophisticated travelers who now quite as a matter of course engage Pullman car accommodations for a projected cross-country journey without even the remote hope of enjoying a new experience, will find awaiting them, if they so elect, an adventure guaranteed to provide its own thrills. Between Chicago and Omaha, perhaps, or at some point along the road leading from Denver to the Pacific coast, let the bored tourist imagine his or her mental reaction to the announcement, in the middle of the night, that it is time to arise and prepare to change cars at "Airplane Junction" for the flight into Mexico or Arizona, or northward into the Canadian Rockies. Even the bare announcement would be enough.

But what, a few years ago, might have appeared to be insuperable hazards have been minimized by the improvements which have been made in flying conditions. Routes have been mapped and lighted with beacons along the way. Emergency landing fields have been provided, and the radio has made it possible to keep in fairly close touch with central receiving stations. It may be that a few years hence the experienced traveler will, instead of utilizing the airplane only in an emergency or for special trips, come to depend upon it as habitually as he now uses the trolley or the railway train.

Words can be the basis of a people's music, according to conclusions to be drawn from the

performances of that little group of vocalists known as The English Singers. Words-matter of thought to Poloniuscan be the support of a national art; and-matter of quarrel to Hamlet -can be, if a certain

the World's Music

Words and

diplomatist had it right ten years ago, the foundation of a national policy also.

For a long time, the underlying thing in music was presumed to be tunes; or, as the philosophers of the foyer would say, instrumental melody. But words, uttered by voices in rhythmic, measured, graduated and interrelated sounds, are undoubtedly sufficient. Because the notion prevailed that string, wind and keyboard instruments were the primary consideration, the great body of music known as the Elizabethan and Jacobean was lost. Because a realization of the pre-eminence of words has come back, this body of music stands again in respect, and the names of Byrd, Weelkes, Gibbons and Mor-

ley become once more known. In broader survey, words are chief, even in those countries that have claimed first musical renown. Take away words, and there would exist no Italian music of any moment, save a handful of pieces for the violin and another for the harpsichord. Take away words, and all of Wagner is gone, and the best of Mozart and Bach is gone. Take away words, and the flute player represented on the Greek vase may cease to puff his cheeks; for there will be no chorus for him to pipe to, and no theater for him to start echoing. Take away words, and out of the feasting hall goes Demodocus with his harp. Should that not be enough, take away words, and the composer of quartets and symphonies must surrender those themes and subjects which he has borrowed from folk song. In fine, take away words, and there remain scarcely any exhts for the ear but practical ones, like the calls of bugle and hunting horn and the alarms of drum and bagpipe.

As for England, music of words seems to have declined in favor there simultaneously with the settlement of the North American colonies; as though everybody who liked to sing emigrated to Virginia or Plymouth, and then immediately forgot how. Reasonably, The English Singers, perfect in speech and true in adjustment of the three feminine and the three masculine ranges of voice, may be supposed to assert in behalf of all nations, tribes and kindreds that use the English language the right, both historical and actual, to the highest musical honors.

### Random Ramblings

American radio enthusiasts are now asking that the next national program shall include a duet by one singer in New York and the other in San Francisco with the Chicago Symphony Orchestra playing the musical score. And that's probably what will be accomplished.

A Marquette University man has found that the average weight of the dot of an "i" is one fifty-thousandth of a grain. You'll have to keep up the practice of not dotting your "i's" for a long time, however, to make an appreciable saving on postage.

The Government is engraving money by a new process designed to make it last longer. As far as some persons are concerned, it could be made of chiffon and it wouldn't last any shorter time than it

Before long now the flowers in their beds will be safely tucked under a blanket of snow and the fish will be snug under a sheet of ice over their river bed.

Scarcely better is the position of the man who has no pay day to look forward to than that of the man who looks forward to nothing else.

Someone has figured that it will cost 30,000 students \$1,273,200 to take their girls to the Harvard-Yale foot-ball game. Ask Dad, he knows.

#### An Unmistakable Will to Have Peace

To the Editor of THE CHRISTIAN SCIENCE MONITOR: A little more than a year has passed since the Locarno Pact was signed. It is not necessary to recall the exuberant delight with which the announcement of its signature was greeted on the part of enthusiastic optimists, nor the skepticism to which it was subjected at the hands of a good share of the French and German press. Today it seems to be generally agreed that springing out of the event of Oct. 16, 1925, has come less indeed than had been expected by the enthusiast, but much more than was believed possible by the skeptic.

The essential purpose and content of the pact was to make possible the advent of real peace along the Rhine. Much, very much, has still to be done to make this an accomplished fact. But for the first time since the empire of Charlemagne split into hostile camps, the possibility of a lasting Franco-German peace, Franco-German recon-ciliation, with, indeed, an entente between the age-long enemies, is the vision and conscious aim of European politics. And it is more, in fact, than a vision; for though it is scarcely eight years since the armistice was signed, already in both French and German publications are being printed headlines about "Franco-German Agree-Franco-German Concord," etc.

Industrial and commercial co-operation is already estab-lished, while intellectual, spiritual and social relationships show most welcome signs of revival. At congresses of various sorts, in athletic competitions, and so on, German representatives are meeting again with French and with

those of other nations.

The Pact of Locarno has had its results, and quite appropriately and justifiably representative men in Locarno arranged for some public recognition and celebration of the first anniversary. For there is among the masses of France, I am assured, and of Germany, as I know from my own observation, a strong and unmistaka-ble will to have peace. Anyone at all observant of public affairs in Germany today is again and again led to this conclusion, particularly if he is able to make comparison

with the trend of former periods.

The all but universal turning away from the old monarchy in Germany, the insistence of a strong party in power to keep down armaments at home, and to work for reduction of armaments abroad, the frank avowal of for reduction of armaments abroad, the frank avowal of pacifism on the part of many prominent men, not a few of them former military leaders, the clear recognition and open avowal that if the war had been won by Germany it would have proved for her a greater disaster than conditions as they did eventuate, all this and many other factors that one on the ground cannot help seeing go to prove that the former glamour of military prowess has largely disappeared, while a sober sense of lasting, higher values and nobler attainments has taken possession of the hearts of the people.

T. D. hearts of the people.

### "Correspondence Courses for Prisoners"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: Your interesting front page article and editorial on "Correspondence Courses for Prisoners" were the subject of much comment here. I trust you will not take it amiss if I direct your attention to the fact that the extension division of the University of Wisconsin has been conducting such courses for over ten years. In 1917, I believe, I wrote an article for a course in journalism describing the work being done by Dr. Andrew Melville of the Osh-kosh division of that university at Waupun Prison, where several hundred inmates were pursuing courses of study.

I do not desire to detract from the efforts of L. R.

Alderman, but if my memory serves me rightly, he was then engaged as an educational specialist in the Navy De-

partment, and I had some communication with him. I suspect the work dates back farther than that, but due to the conservatism of many educational institutions, the fact was not very widely known that these correspondence courses were offered to immates of penal institutions:

#### The Capital and Labor Situation in Britain

To the Editor of THE CHRISTIAN SCIENCE MONITOR:

I was interested in reading a recent article in the Monros, entitled, "The Diary of a Political Pilgrim," from a London correspondent. This article dealt with the very awkward situation between Capital and Labor

that exists today in Great Britain.

There can be no doubt that your correspondent is quite right in the most pertinent of his remarks, which I take

to be:

1. In particular they (the capitalists) have not recognized the modern tendency to acknowledge that high wages are good business because they create the home market; that wages dught to be accurately related to the value of the worker's output, so that the worker can consume the full value of what he produces and that the primary function of the capitalist and employer is to produce a steadily rising standard of living for the whole community.

2. In consequence the trade union world clings with tragic fidelity to a policy (antagonism and non-cooperation with the employing class), which has the effect of impeding output, delaying and often preventing the adoption of new machinery and methods, discouraging efficiency both on the part of capital and labor and so of making impossible that increase in the standard of living which it is the primary desire of the worker himself to achieve.

3. The policy of the employers is one of the principal causes of the non-cooperation of Labor and the policy of the trade unions is one of the principal causes of the in-efficiency of Capital.

And anyone who has read the "Report of the Royal Com-mission on the Coal Industry (1925)" will indorse them. The point of view of Capital toward Labor is very well illustrated in the following extract from page 141 of that

The Miners' Federation submitted in evidence a table of bonus shares issued since 1912 by thirty-four companies engaged in mining and other business and amounting to over £17,000,000 out of a total capital in those companies of £45,000,000. We refer to the table only to suggest that it would probably have been from every point of view an excellent allocation of resources had the companies issued some of those bonus shares not to the shareholders but to

Thus we see that nearly 38 per cent of the existing capital of thirty-four companies consisted of shares issued to stockholders based on the very great profits made in coal since the war broke out and that Labor got none of it except in so far as it was able to force higher wages by threats and strikes. These higher wages, in conjunction with the capitalists' profits, put the prices of coal so high that the foreign market would have been largely destroyed had it not been for the subsidy of £23,000,000, which was brought to an end last May.

With regard to your correspondent's statement that

It is only right, however, to add that the post-war period has been a singularly difficult one in which to put these ideas into application.

it is very true that the unsettlements following the war have created a ferment of good, bad and indifferent ideas, but underlying all this is the consciousness that the meaning of the battle cry during the war that "England must be made a country fit for heroes to live in" must be given

Capital is more and more awakening to all the meaning of this cry, and as through many difficulties it strives to attain that end the hostility of Labor will diminish, and we shall see relations between the two very much resembling those that exist in the United States. M. B. W.

Baltimore, Md.

### The Press of the World

The opinions expressed in the quotations hereunder do not necessarily carry the indorsement of the Monitor.

### Newspapers and Crime

WHEN considering crime and its causes, one is forced to wonder how great a part of the responsibility for the so-called crime wave may be chargeable to the sensational newspapers of today. Outside of the New York Times, the Cleveland Plain Dealer, The Christian Science Monitor, and a few of that class, where could the young criminal find a better schooling in crime than from the front pages of the daily news-papers and the feature articles in the supplements of the papers? To speak of them as primers of crime would be mild. If one were seriously bent on compiling a handbook of crime, for use of criminals, all necessary material could be taken from our average daily news

Let any unprejudiced person, who thinks the above is overdrawn, study the first newspaper that comes to hand, and read the headlines of the featured news. Then read the detail with which every phase of any crime is described; the methods used in committing the act; the supposed manner of escape; what the detectives have discovered in the way of clues and how they plan to catch the perpetrators. Then search for news regarding some of the worth-while things in life, some noble action, deed of devoted self-sacrifice in the interests of mankind, any one of the things that help to make the world better and inspire emulation in the hearts of others. Do you find it on the front page, with a heading an inch high? Or is it most often found on an inside page, in an inconspicuous place? What impression can the criminal mind receive when it sees crime hold the chief place in the daily news, other than the belief that it is the big thing in life and the "news" of the world?

Of course, it would be folly to attempt to remedy the conditions by law, for the freedom of the press must ever be one of our great rights; but, almost without excep-tion, the men controlling our newspapers are men of high character and vision, seeking the greatest good of our country and its people always. Why do they not make the question of newspaper influence on crime one of the leading subjects for discussion at meetings of their association? For their next meeting, whenever held, may we suggest the question—"What influence are we, as newspaper men and citizens, trying to exert in our country?"—The Echo (published by inmates of Western State Penitentiary, Pittsburgh, Pa.)

### Reason for Hope

Assuming that there can be no discounting the recent statement of the headmaster of the Lawrenceville (N. J.) school for boys, that the boys of today "are five times as decent, as truthful, and as manly as the boys of my youth," it must be that as much can be said also for girls. And if both boys and girls are five times better than the youth of the last generation, it is time pessimism and despair concerning society's survival were sewed up in a bag and dropped off the bridge at midnight at the openof the glad new year. . . .

The precise truth perhaps cannot be affirmed. Perhaps boys today are only 21/2 times better than boys used to be; perhaps girls are no more than 2% times better. The headmasters and seminary principals may be left in joint session to give mathematical point to this curious problem. Yet, if half or quarter of what Dr. Abbott said postprandially is true, there need be no post-mortems on society or the state in the present century.— Springfield Republican.

### Freshmen Smokers

The use of tobacco is not as common among college students as the public had supposed, if figures compiled for the freshman class at Ohio State afford a criterion. Out of a total of 2184 men, 430 are cigarette smokers, slightly less than 20 per cent of the class. - Cleveland

### Conscripting Wealth

"Any future policy of conscription should be inclusive, applicable in terms to the entire personnel and the entire wealth of the whole Nation."

These words of President Coolidge, in his recent speech at Kansas City, are in line with manifest destiny. No one can contrast the Civil War and the World War with-out realizing that we have undoubtedly had our last struggle in arms in which private money-making continued. In the Civil War, anyone could be relieved from conscription by money. He could pay his way out, or he could buy a substitute. In the World War neither possible. The children of the rich were at an actual disadvantage. The poor often had to stay at home to port somebody, while the rich could not cite that claim to an exemption: We had great Liberty Loan drives in the last war, parades, processions, and patriotic appeals for money. We shall not have these again. The Nation will simply take the money, as President Coolidge, a thoroughgoing conservative, now advocates. It may not be

### More Rubaiyat

tation of life on the other. Boston Herata.

wise; it may not be expedient. On these points we can-

not now answer, but we feel sure that no democracy

will again permit a war to stimulate private operations

and private profits on the one hand, and effect a devas-

Lovers of Omar Khayyam and his Rubaiyat (may their ribe increase!) will be delighted to learn that some more Rubaiyat of the astronomer poet of Persia have been re-cently discovered. A correspondent of the Daily Gazette of Sind states that during the course of the construction of a new Government Building at Sehwan, in the Larkhana district of Sind, while excavations for the foundations were being made, a brass case was unearthed which contained a manuscript with many hitherto un-known Rubaiyat of Omar Khayyam. Translations of some of the quatrains nave already been made, the cadence and rhyme being said to be as in the classic translation of the Rubaiyat by Fitzgerald. The Rubaiyat are gems of "purest ray serene," and the discovery of even a few more will be hailed with delight the world over .-Bombay Chronicle.

### The New Tokyo

"Many changes, no change." Like epigrams in general, it is not the whole truth, but it has point enough to make it a passable text for some first impressions of the new Tokyo. Old things have gone, new things have come. Places that were . . . well known . . . have become unfamiliar. Where a shanty was, a skyscraper is. To say that a new city has arisen between the Sumida and say that a new city has arisen between the Sumids and the most is a kind of literal truth. Yet the essential Tokyo remains. The personality of the city is unchanged; it has, indeed, been emphasized. . . The traveler steps out of the station on one of the most impressive and certainly the most individual coup d'œil that any modern capital can furnish—the skyscrapers, white from the builder, on either hand, and in front the most, the pines, the cyclopean walls of old Japan's inner-most heart.—Japan Advertiser (Tokyo).

### Delivering the Goods

The trouble with religion in the United States has not been an ill will or the want of demand. The real trouble is that there has not been enough delivery of the goods by religionists. You can advertise until selling talk and slogans and follow-ups are stepping on each other's heels and elbowing each other's ribs—but if you don't deliver the goods the advertising is lost. Of course, there has been some delivery—just as there has been some advertising. But if there is any prime need of speeding up it is in delivery. Sober-minded churchmen everywhere will admit that.—Dallas News.
